# Produktbeskrivelse

Framery One er ideel til arbejde, opkald eller videokonferencer, hvor der er behov for samtaler i fred og uden at forstyrre dine omgivelser.

Den klassiske telefonboks opfylder førende lydisoleringsstandarder og har ekkofri akustik, hvilket giver et behageligt arbejdsmiljø i boksen.

DTU har valgt boksen uden fastmonteret stol pga. fleksibiliteten. Vi anbefaler tilkøb af skammel, der kan sættes ind under hæve/sænkebordet, når man ønsker at stå op.

**Framery Connect** Sign up to Framery Connect, our revolutionary digital service, to make sure you always have the best possible version of Framery One. Enable future software updates by activating your Framery One in Framery Connect. Check the pod's availability and make reservations through Google and Microsoft calendar systems with the *Bookable Pods* functionality. When vacant, the pod can also create an automatic calendar reservation upon entry. You can also extend your current reservation with the touch of a button directly to the UI Panel. And stay up to date with all upcoming features from Framery Connect!

**UI Panel** From the UI Panel, you can adjust the pod's lighting and ventilation according to your personal preferences. Choose from Work Mode or Video Mode lighting presets, or control the brightness of both lights individually. The integrated 4G module enables to see the pod's availability, and make reservations directly with the *Bookable Pods* functionality on the touchscreen. Charge your devices via power outlets (1 power socket, USB C socket, optional LAN) located on the UI Panel.

**Video conference light**  
A dimmable LED panel embedded into the tech wall of Framery One improves the experience of video calls. Warm light is cast on the user's face in a wide spread with excellent color rendering capacity (90CRI), providing excellent illumination without bothering the user. The 4000K color temperature guarantees a natural look and feel with optimal user comfort. Adjustments to both the video conference light and the ceiling light can be made easily via the UI Panel.

**Occupancy light**  
Stepping into the pod, Framery One's occupancy lights will display a red light with 360° visibility to let the office know the pod is in use.

Ekstra info vedr. aktivt kulfilter:  
Kulfilter er som det eneste ikke standard. Uden kulfilter er den samlede luftstrøm i Framery på 29 liter/sekund, det er over fire gange højere end anbefalingerne.

Filteret holder luften inde i boksen ekstra frisk, ren og fri for lugt. Filteret fjerner også forurenende stoffer fra luften med en adsorptionsproces. Den samlede luftstrøm reduceres til 26 liter/sekund.

Ved tilvalg af kulfilter anbefales det at udskifte filteret en gang om året.

Det skal bestilles via Input som også står for udskiftningen.

Pris: 1475 kr. inkl. levering og montering.

**Activated carbon filter**  
Keep the air inside Framery One extra fresh and clean and free of odors with an activated carbon filter. The filter removes pollutants from the air with an adsorption process.

**Wireless charger** Charge your phone fast and wire-free inside our pods! The charger itself is located underneath the table, with a sticker on top of the table indicating where to place your phone to get it charged.

**LAN Port** It is possible to add a LAN Port to the UI Panel. This option includes a LAN cable.

**Movability kit** Framery One can be easily relocated without disassembly by lifting the levelling feet up and thus lowering the pod onto its wheels. The high load capacity polyurethane castor wheels are both durable and pliable. Number of wheels: 4.

Ekstra info vedr. mobilitet:

Boksen hviler ikke på hjulene, når den er på plads, men står på justeringsfødder.

# Booking af boks via kalendersystem

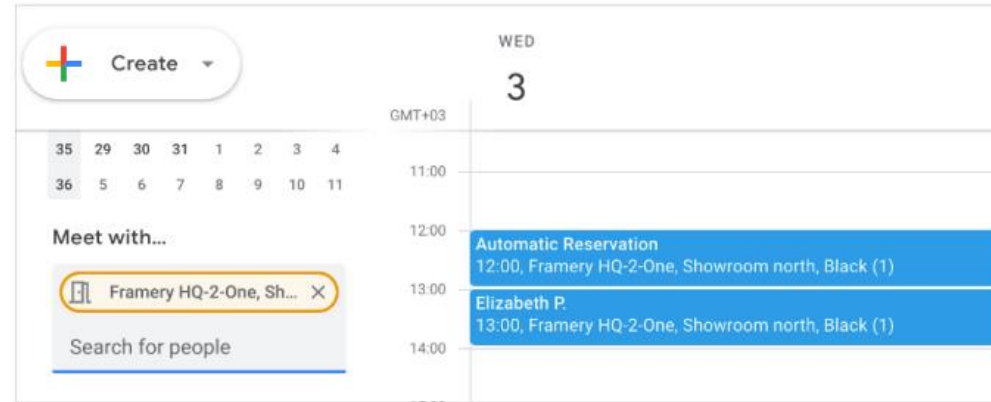

## Framery One & Framery Connect Bookable Pods

Decrease the amount of 1-person phone calls happening on meeting rooms by integrating your *Framery Ones* as bookable resources on your existing calendar system.

Enhance the *ad-hoc usage experience of pods* as the *Framery One* shows the calendar status via the control panel, and creates automatic reservation to it when someone enters the pod.

Get real-time status of currently available meeting pods to your existing calendar system!

framery

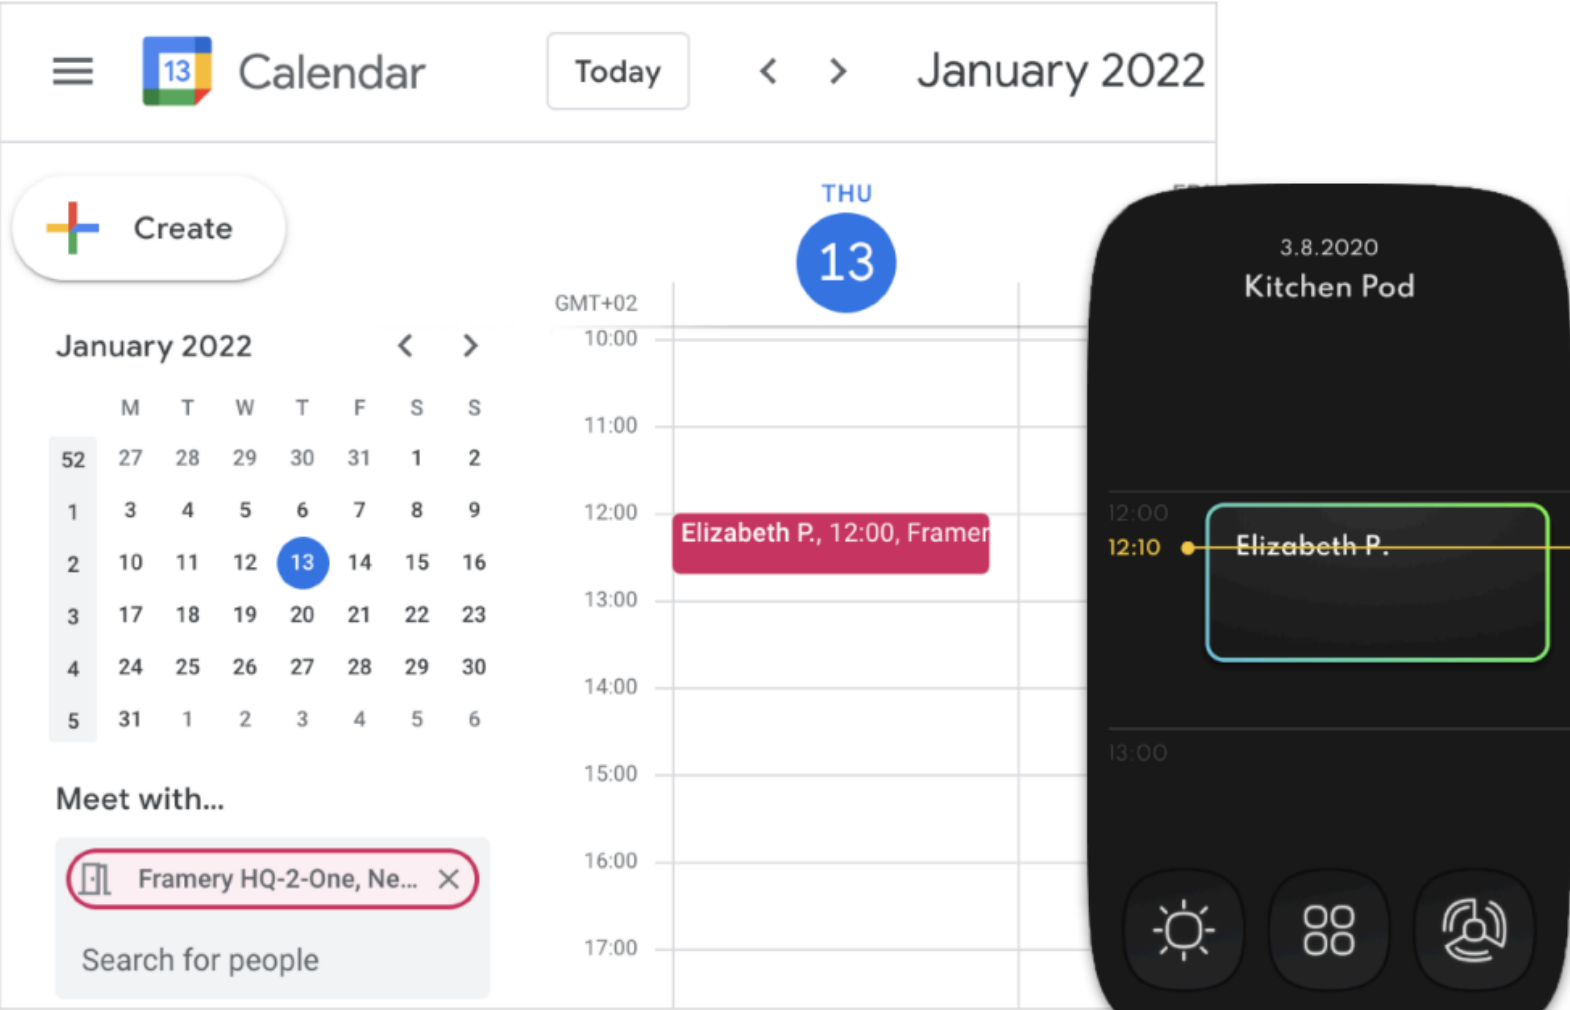

Framery One can be integrated with your *Microsoft Office 365* and *Google Workspace* calendar systems.

# Bookable pods: reserve a pod in advance

In *Framery Connect* you can pair your pod with a **calendar resource** in your existing Google Workspace/Microsoft 365 system.

This will mirror the reservation situation of that calendar resource to the screen of the pod, and will allow booking of the pod for meetings beforehand.

The person doing the booking can be ensured that they will have a sound-proofed reserved just for them for their important call - and if there is someone at the pod before that, they will be told to leave before the booking starts.

# Bookable pods: Automatic Reservation

*Bookable Pods* does not prevent ad-hoc usage of the pods. Instead it enhances that experience.

When someone enters a pod connected to calendar, *Framery Connect* will automatically create a booking to the calendar so the person can be sure that no-one will reserve the pod while they are there. Reservation is extended automatically as long as the user stays in the pod.

If there is an upcoming calendar reservation for that pod, the current user of the pod will be informed that how long they can work interrupted before they must leave.

The image displays a mobile application interface for managing pod reservations. The main screen shows a calendar for January 2022, with the 13th highlighted as a Thursday. A 'Create' button is visible at the top left. Below the calendar, there is a 'Meet with...' section with a contact entry: 'Framery HQ-2-One, Ne...'. To the right, a time slot grid shows a reservation for 'Elizabeth P.' from 12:30 to 13:00. A smartphone overlay on the right shows the 'Kitchen Pod' interface, displaying the date '3.8.2020', the pod name 'Kitchen Pod', and a reservation for 'Elizabeth P.' at 12:10. The smartphone interface also features icons for brightness, app drawer, and connectivity.

# Bæredygtighed

in our own production processes, and therefore we have no need for industrial wastewater handling.

## Product design circularity

Our circular design thinking and concrete actions taken are also particularly evident in the product design of our pods. Our pods, and particularly our next-gen Framery One acoustic pod, are highly modular in terms of construction and easily assembled, disassembled and reassembled according to our customers office, or other venue-based needs. The fact that our pods are highly modular means they can easily be taken apart and moved to new physical locations according to changing circumstances before being rebuilt. This allows our pods to be continually reused and even to find new homes with new customers (see our 'Subscribed' model for more information). We have an extensive inventory of spare parts used for maintaining, refurbishing or upgrading our existing products.

Our component raw materials are also carefully chosen to support the principles of circularity, with our laminated glass being composed of 15% and our steel materials of 20% recycled material. Furthermore, our felt materials consist of 60-70% of recycled plastic bottle materials. For more information on our materials, please see [page 22](#).

Material efficiency %

Waste, by type and disposable method (kg), metric tons	2019	2020	2021
<b>Hazardous</b>			
Recycling	0.30	0.30	0.55
<b>Non-hazardous</b>			
Energy recovery	172.7	274.4	290
Recycling	328.4	65.1	102
Landfill	5.2	0.3	0.2
Composting	1.9	2.8	3.6

## CASE

## Læs Framery Sustainability Report 2021 på Inside [her](#)

### Framery One sustainability and circular economy

Our recently launched Framery One acoustic pod arrives with industry-leading sustainability and circular economy benefits.

Framery One is a top-of-the-line futureproof pod that combines 4G technology and a digital ecosystem with superior acoustics and Framery's distinguished design DNA. It is the world's first-ever GREENGUARD Gold Certified acoustic pod, meaning there are no hazardous chemical emissions. The materials used in Framery One are safe, sustainable, and high quality. The structure is constructed from steel, which means that 95% of the material used in your pod can be recycled. In addition, Framery One features wheels, allowing users to re-arrange the product within the office as needed over time. As it can be difficult to re-organize an office without renovating, especially during the pandemic-related disruption, this feature allows the product to be more adaptable and flexible for user needs. Utilizing a Framery One acoustic pod also mitigates the need to have to construct a permanent, expensive, resource intensive and environmentally negative meeting room.

circular economy business model, a 'product as a service', meaning we can fully refurbish one of our products after it has been used by one customer and then lease it to another customer. The result is that our products are made to last even longer and can potentially deliver multiple 'lifetimes' of service. Framery One is the most sustainable pod in the world.

Framery One has been designed to have a lifespan of up to 50 years, and it will improve over time due to its intuitive software that keeps the pod up to date as technology evolves. Its future-proof, modular design ensures that the pod can be upgraded as new tech specifications or working methods become the norm. Finally, to contribute to the circular economy, Framery One features an innovative maintenance system with parts that are readily available and easy to replace. The pod can also become part of the 'Framery Subscribed'

# Garanti/Reklamation

Input Interior stiller garanti i 24 måneder fra leveringsdatoen.

Ved reklamation, kontakt enten Jesper eller Casper, se nærmere info ved "DTU's kontaktpersoner".

# Test af møde- og telefonboks til DTU

Campus Service, Arbejds miljø & Beredskab (CAS AB) indledte i 2021 en undersøgelse af møde- og telefonbokse til DTU.

Der blev udvalgt 5 bokse ud fra kriterierne lydisolation og luftkvalitet (ventilation). Vi gik videre med 3 af de 5 bokse, som blev stillet op i CAS-huset i Lyngby over en periode på ca. 1 måned.

Ansatte i CAS havde her, sammen med alle arbejdsmiljøkoordinatorer og ergonomiambassadører på DTU, mulighed for at prøve de 3 bokse og besvare et spørgeskema.

Inden boksene blev afhentet, blev de testet af CAS HVAC medarbejder, klima- og miljøtekniker, Thomas Søndergaard Hansen.

Spørgsmålene i spørgeskemaet blev pointgivet fra 0-5 point og endte med nedenstående gennemsnitlige resultat:

- Plenty Pod – 3,285 point
- Framery One – 4,219 point
- Silentlab Prime – 4,266 point

Årsagen til at vi har valgt at gå videre med Framery One (som jo blev nummer 2 - dog kun med 0,047 point efter nr. 1) er, at boksen er udstyret med et hæve/sænke bord og at 2-personers boksen i Framery-serien er bedre udstyret, hvis DTU en dag også skal forhandle 2-personers bokse.

Hvis du vil vide mere om test-processen, spørgeskemaet, decibel eller PPM, så ligger der en beskrivelse af processen på DTU Inside [her](#)

# Elektriske installationer i flugtveje på DTU

Ønsker du tilføjelse af en elektrisk installation i en af DTU's bygningers flugtveje, så skal dette godkendes af en certificeret brandrådgiver jf. Bygningsreglementet 2020 – med mindre der foreligger en eksisterende tilladelse i brandstrategirapporten, funktionsbeskrivelsen eller byggetilladelsen for det pågældende byggeri.

Tilladelser kan eventuelt findes her:

- DTUDOCX
- DTU FM
- Kommunens elektroniske dokumentssystem for byggesager

Du kan foretage en elektronisk bestilling til DTU CAS via bestiller systemet: [Services - DTU Inside](#) såfremt du ønsker en elektrisk installation placeret i flugtvejen. DTU CAS vil herefter varetage opgaven. Såfremt du selv ønsker at varetage installationen, så skal du selv sørge for kontakt til certificeret brandrådgiver samt dokumentation af tilladelser.

Ovennævnte tekst er fra DTU Inside, som kan findes [her](#)

# Tilkøb – stol/skammel med gaslift

Model A.

Pris: 2145 kr. inkl. levering og montering

Højdejusterbar 580-790 mm

Tekstil: Black Fame 1161 (60999)

Metalbase: Sort

Model B.

Pris: 1045 kr. inkl. levering og montering

Højdejusterbar 590-845 mm

Farve: Dyb grå

# Pris og bestilling

**PRIS:** 61.000 kr. inkl. levering og montering men ekskl. stol og kulfilter (tilkøb)

**LEVERINGSTID:** 4-6 uger

**BESTILLING:** Framery One er ikke oprettet som en vare i FUSION, hvorfor første step er at kontakte Input Interior og få et tilbud. Derefter skal formularen "ikke-katalog ordre" udfyldes og tilbuddet inkl. evt. stol og/eller kulfilter vedhæftes

## **TILKØB AF STOL:**

Model A. Pris 2.145 kr. inkl. levering og montering

Model B. Pris 1.045 kr. inkl. levering og montering

**TILKØB AF KULFILTER:** 1.475 kr. inkl. levering og montering

**SAMME MODEL - ANDRE ØNSKER:** Det er muligt at vælge boksen i andre farver og med andre funktioner, men til en anden pris og anden leveringstid. Gå i dialog med Input Interior. Bestillingsproceduren er den sammen

# DTU's kontaktpersoner hos Input

Hvis I ønsker at bestille en Framery One møde og telefonboks, skal I henvende jer til Input Interior, som står for levering/montering af Framery One til hele DTU.

Hvis I har spørgsmål eller ønsker et tilbud, så står vi klar til at hjælpe jer. Kontakt enten Jesper Christjansen (sælger) eller Casper Grandt (salgssupport, kundeservice)
