Beskrivelse

Personal safety when working with epoxy and isocyanates Description: This is a mandatory course in accordance with Danish occupational health and safety legislation for anyone working with epoxy and isocyanate-containing products. The course provides knowledge about health risks, correct use of personal protective equipment, and the necessary workplace safety measures. Participants learn to identify hazards and work responsibly to prevent injuries and allergies. For companies: Do you have 12 or more employees who need this mandatory training? Contact AMU SYD info@amusyd.dk directly to learn more about the options for arranging a customized company course, which can also be held at your workplace.
