

Are you working with genetic resources originating outside of Denmark?

No

You are done

Yes

Is the work (research or development) taking place within the EU?

No

The utilization of genetic resources taking place outside the EU are not subject to the ABS regulation, but could still be subject to the Nagoya protocol in other countries. Check ABS clearing house (<https://absch.cbd.int/>)

Yes

Is the country of origin for the genetic resource party to the Nagoya protocol?  
- Check ABA clearing house:  
<https://absch.cbd.int/>

No

National or other international regulations concerning the access and utilization of genetic resources in the country of origin could still cover your resource. Check with the relevant competent national authority (<https://absch.cbd.int/>)

Yes

Was the genetic resource accessed after October 2014?

No

You are done

Yes

You must obtain an international certificate of compliance as documentation for 'prior informed consent' and mutually agreed terms' from the competent national authority in the country of origin via ABS clearing house (<https://absch.cbd.int/>).  
You must complete a declaration of due diligence from the Danish Environmental Protection agency (to obtain the appropriate form email: [absprotokollen@mst.dk](mailto:absprotokollen@mst.dk))
