

Guide Name	Installation of eduroam on a computer
-------------------	--

Do NOT run the installation file on a DTU computer. If you do, you risk that eduroam will stop working on the computer, and it can be a difficult process to get it working again.

Step	Description	Navigation
Go to eduroam's website	You download the certificate on https://cat.eduroam.org and click on the install button.	
Download installation file	<p>Select organisation DTU - TECHNICAL UNIVERSITY OF DENMARK</p> <p>Select your computer's operating system: Windows computer = select Windows Mac or Linux computer = select DTU (Non Windows). Click to install.</p>	
Run setup file and log in	<p>Follow the instructions for installation.</p> <p>Log in with your DTU username in the format username@dtu.dk and your DTU password.</p> <p>You have now downloaded the latest certificate and (re)installed your eduroam profile on your computer.</p> <p>You must NOT run the installation file on a DTU computer.</p>
