

# **Evaluering af studiestarten 2025**

## **General Engineering**

---

**Oktober 2025**

## Samlet svarfordeling

Systemet evaluering.dtu.dk er blevet brugt til gennemførelse af studiestartsevalueringen. Her er det oplyst, at 135 ud af 135 studerende på General Engineering har gennemført evalueringen, hvilket svarer til en svarprocent på 100%.

Bemærk, at den samlede svarprocent for enkelte spørgsmål ikke er 100%, men 99% eller 101%. Det skyldes, at platformen evaluering.dtu.dk, som er blevet brugt til gennemførelse af studiestartsevalueringen, ikke oplyser den procentmæssige svarfordeling for de enkelte svarmuligheder tilknyttet et spørgsmål, men alene oplyser antallet af besvarelser. Svarprocenterne er derfor beregnet manuelt efterfølgende. Da procenttallene er med decimaler, er de rundet op, hvis det er 5 eller derover, eller rundet ned, hvis det er 4 eller derunder.

Spørgeskemaet blev indledt med et spørgsmål om de studerendes generelle trivsel på studiet:

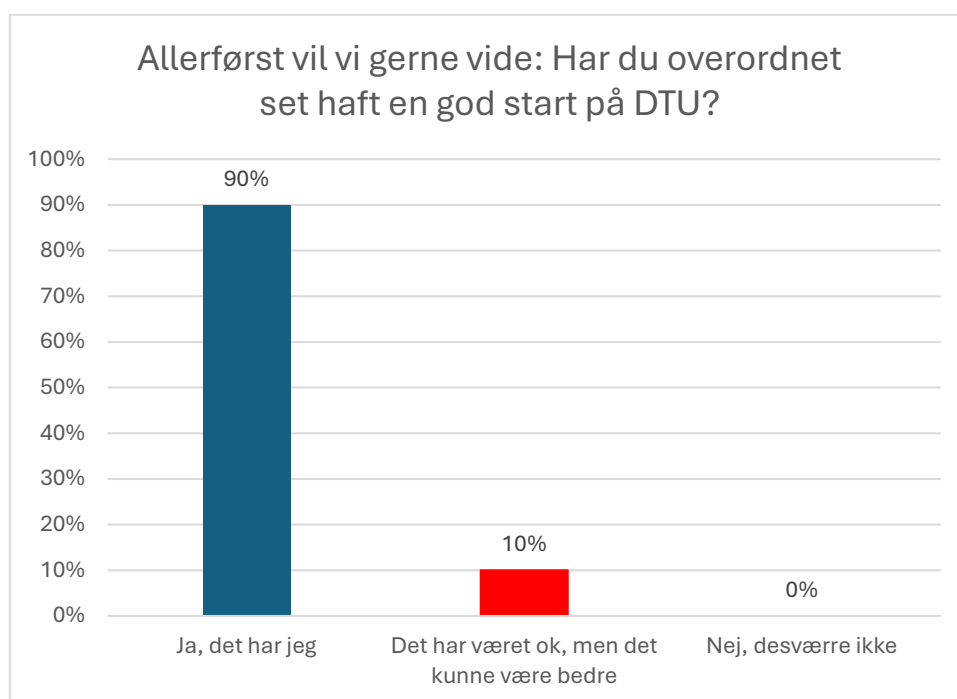

Diagram 1. De studerendes overordnede oplevelse af studiestarten på DTU.

Herefter fulgte en række overordnede spørgsmål om de studerendes deltagelse i og oplevelse af studiestartstilbuddene på DTU. Det blev indledt med denne tekst:

### Hvordan har du oplevet de forskellige tilbud i studiestarten på DTU?

På DTU er der en række forskellige studiestartstilbud og aktiviteter til nye studerende, som ligger før selve undervisningen og semesteret går i gang. Vi er nysgerrige på at vide, hvilke dele du har deltaget i, hvordan du har oplevet dem, og hvorfor du evt. ikke har deltaget.

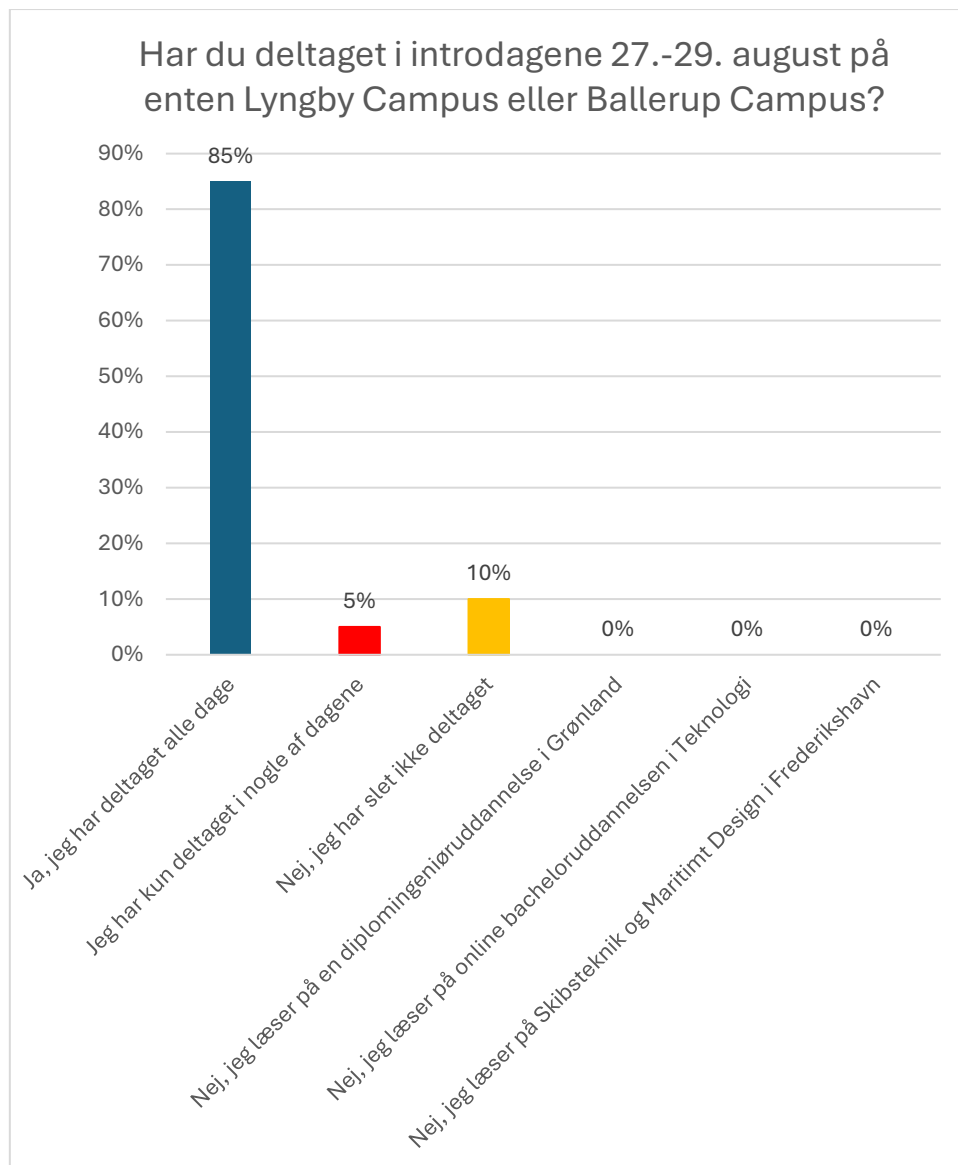

Diagram 2. De studerende deltagelse i Velkomst- og Introdagen

10% af de studerende, svarende til 13 studerende, svarede, at de slet ikke havde deltaget i introdagene. De studerende blev stillet et uddybende spørgsmål:

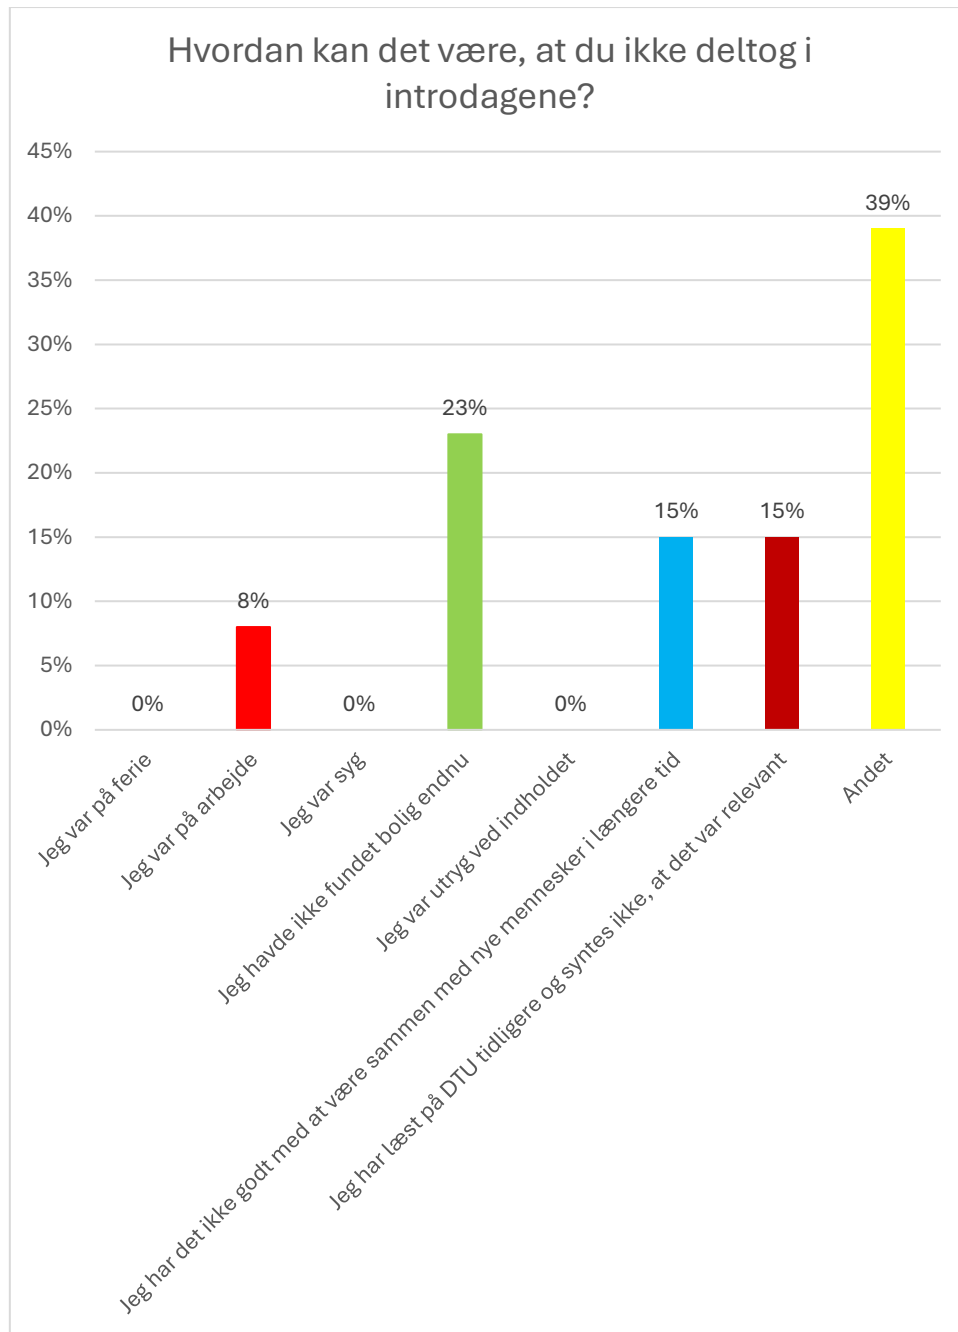

Diagram 3. Uddybning af manglende deltagelse i Velkomst- og Introdagen

5 studerende havde valgt svarmuligheden 'Andet'. De studerende havde mulighed for at uddybe deres svar vha. en fritekstbesvarelse.

#### Uddyb gerne dit svar

- Jeg har tidligere læst på dtu og er udtaget for studieaktivitetskrav grundet frivillig arbejde i relation til DUF (DSF)
- Though I really wanted to visit the study start, I couldn't do so as I was in Holstebro waiting for a residence permit to start my studies at DTU.
- My BDTU contract started on 1 September.
- There was no flight for me to board in that week.

De studerende, som havde svaret, at de havde deltaget i introdagene, blev stillet 8 uddybende spørgsmål om, hvordan de samlet set havde oplevet indholdet i dagene:

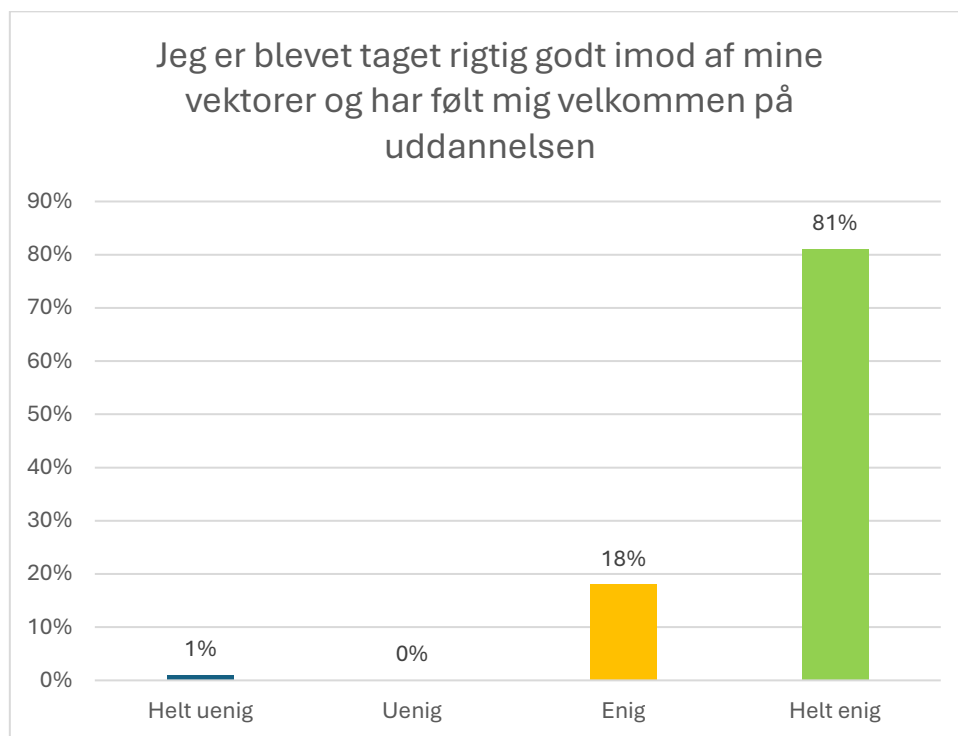

Diagram 4. Første uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

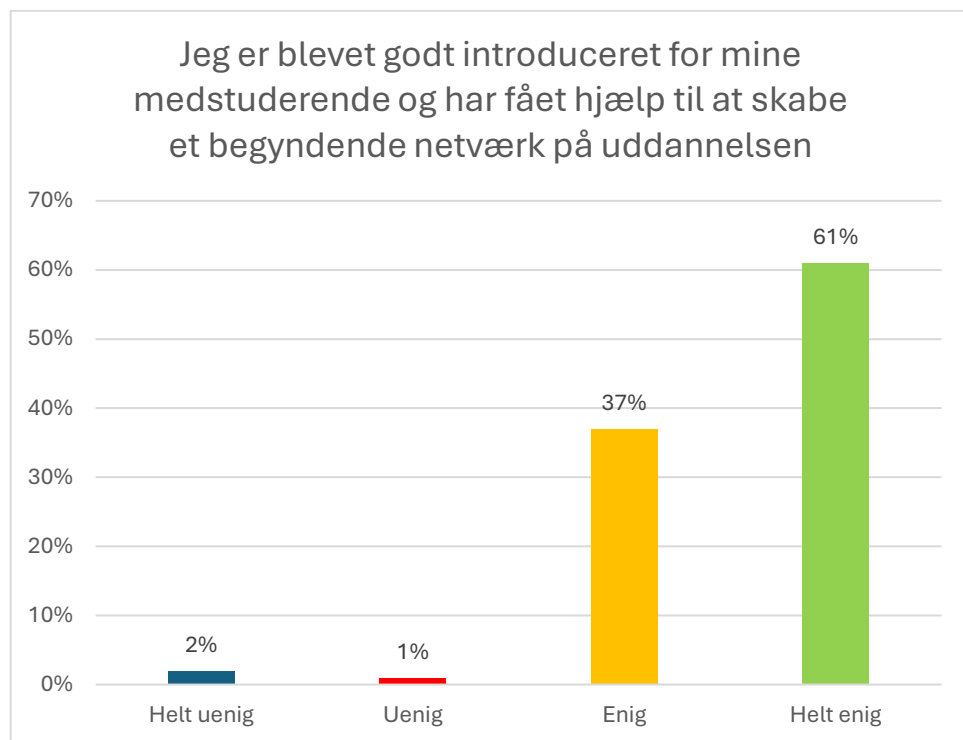

Diagram 5. Andet uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

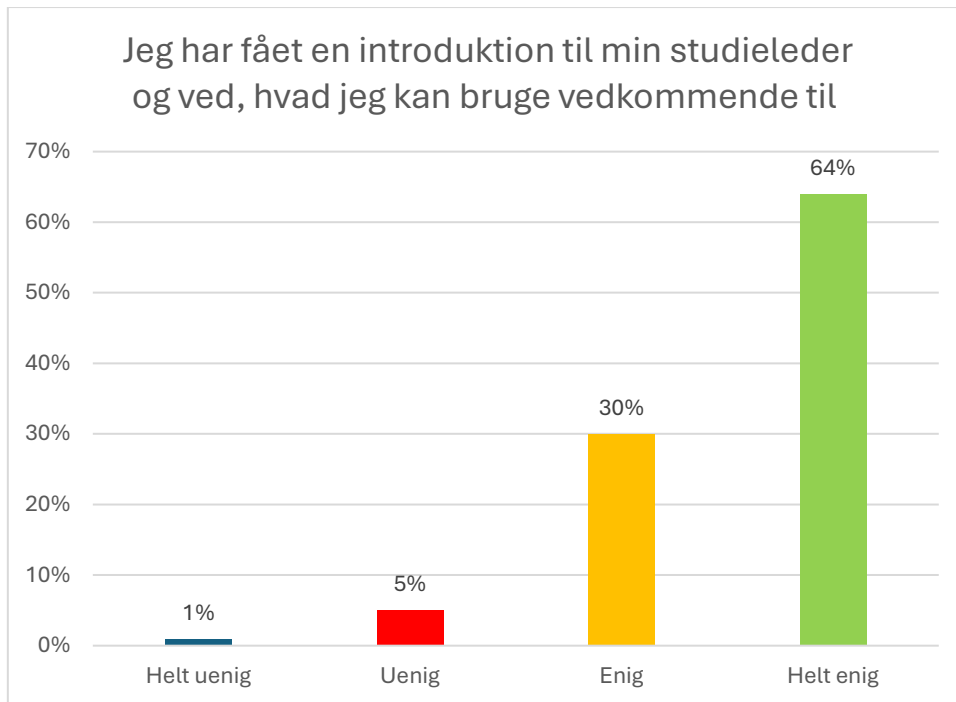

Diagram 6. Tredje uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

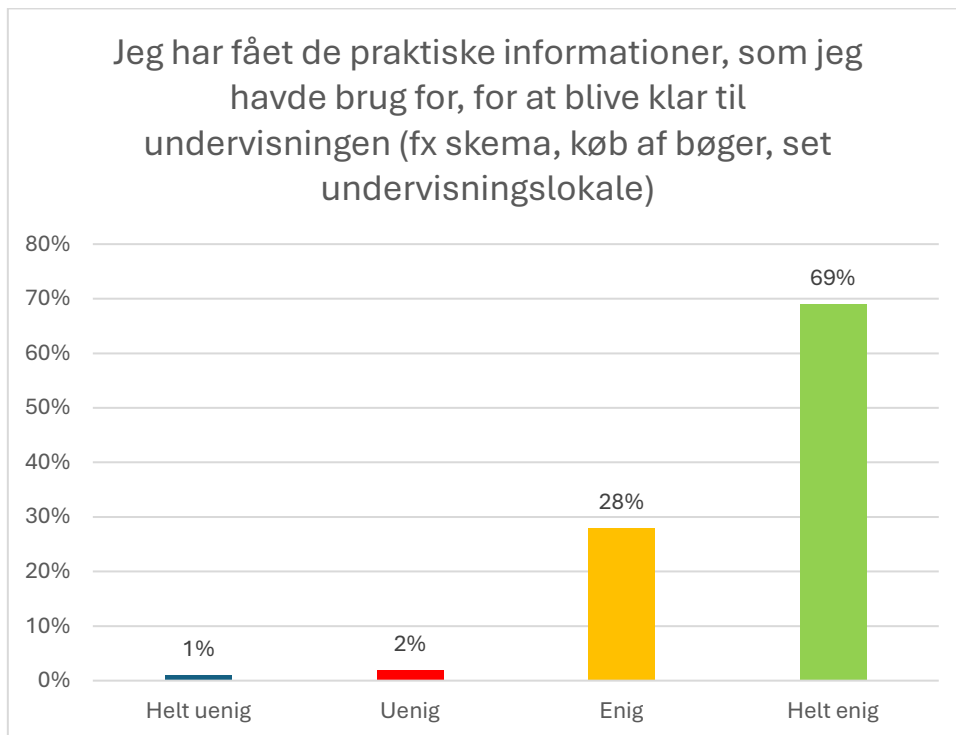

Diagram 7. Fjerde uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

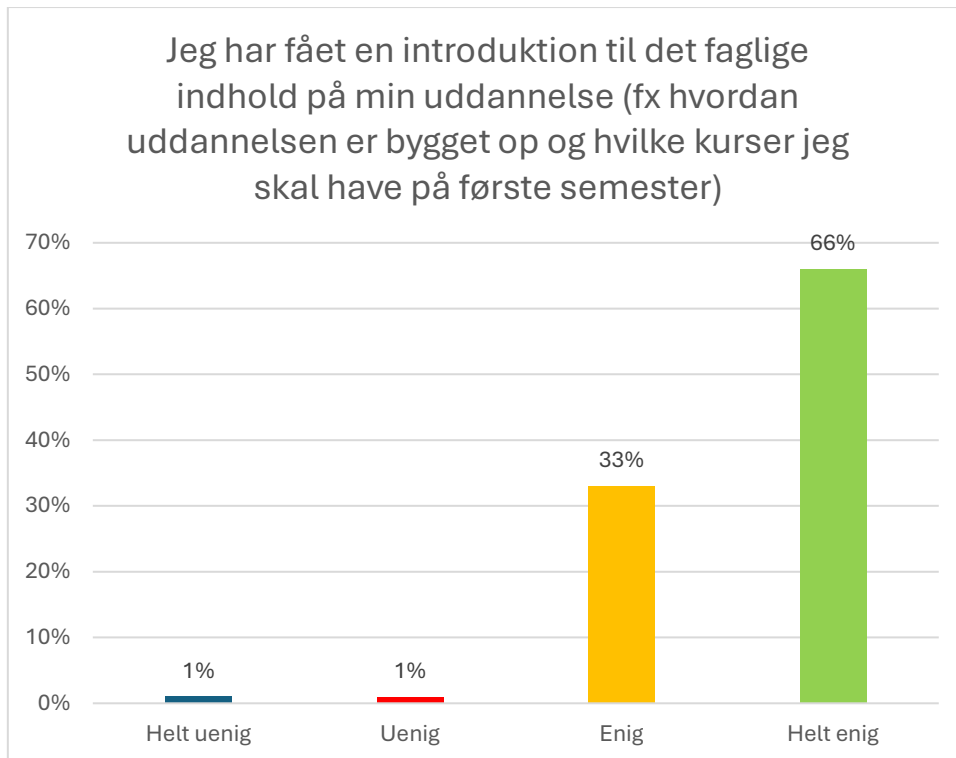

Diagram 8. Femte uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

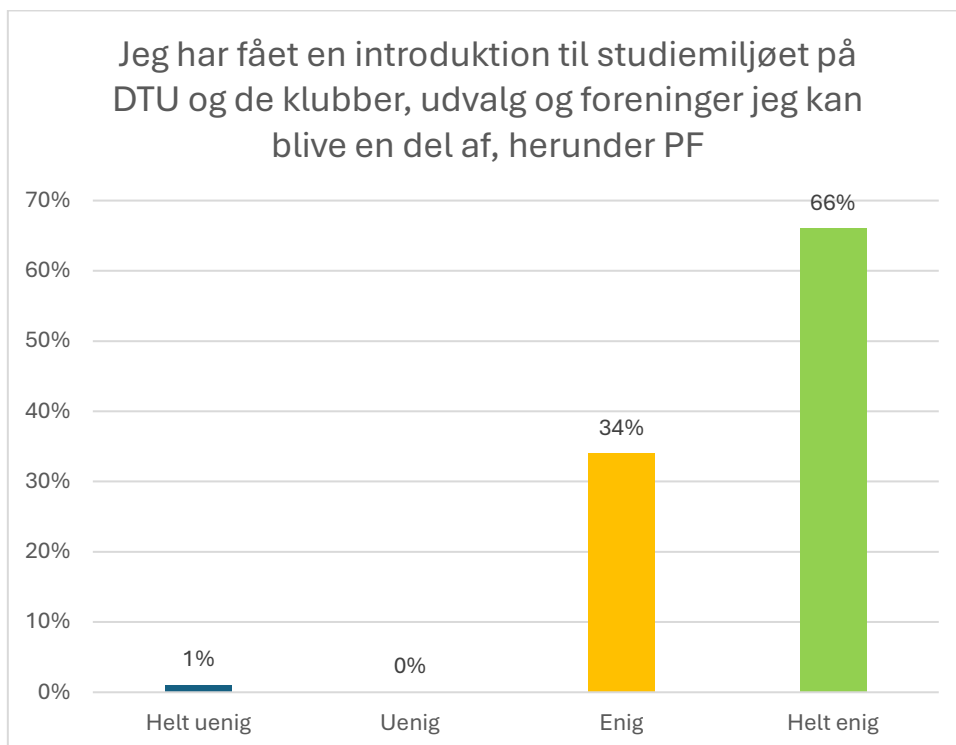

Diagram 9. Sjette uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

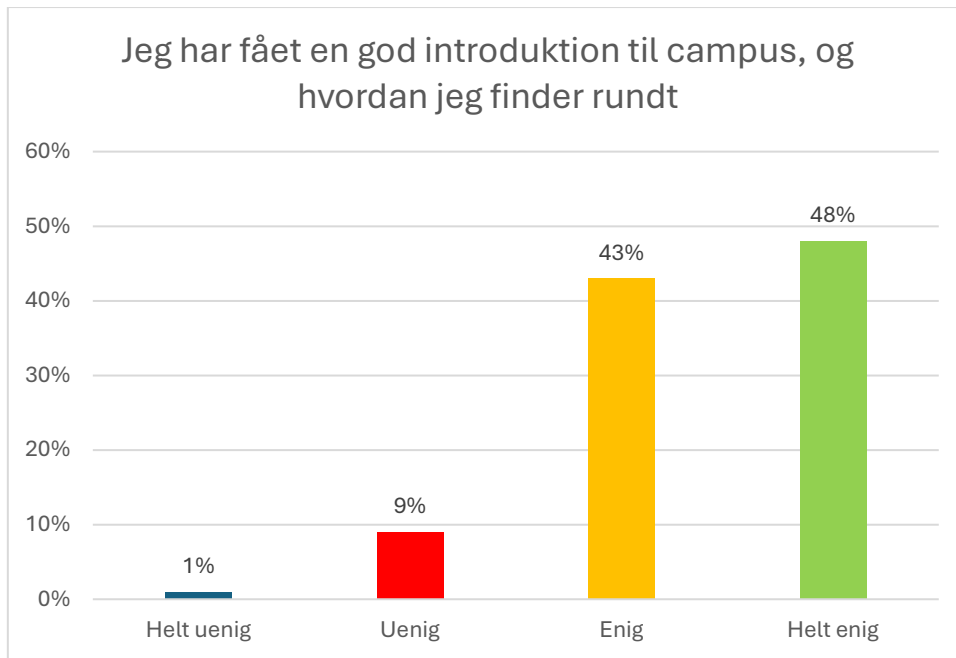

Diagram 10. Syvende uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

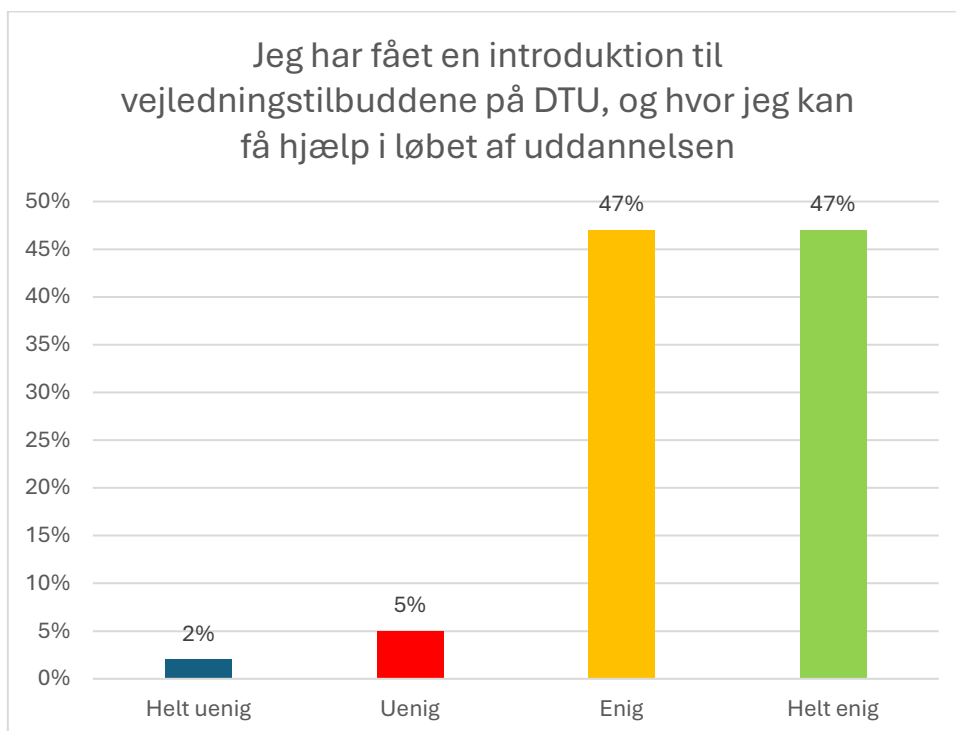

Diagram 11. Ottende uddybende spørgsmål om de studerendes oplevelse af indholdet i introdagene.

Alle de studerende blev spurgt ind til de informationer, de havde brug for inden semesterstart:

**Var der nogle informationer, du manglede, inden undervisningen gik i gang? Hvis ja, må du meget gerne skrive dem her (valgfrit):**

- how to use the studyplanner
- Nej
- No
- no
- A quick guide on how to use learn.dtu would have been nice
- altså det kunne have været godt med lidt mere rundvisning
- No
- No
- Det finder jeg nok ud af.
- No
- nej
- More information about clubs and the overall campus tour would have been helpful.
- I felt that there could be more information on the commencement of studies exam
- No
- No
- Although I am content with the introduction to the program and important deadlines, I wish that there was more practical information and guidance, specifically, concerning the grading scale and how to plan future classes with timetables in mind to avoid back-to-back classes or overlapping schedules. Despite the course descriptions being quite helpful in that regard, it is still a challenge to not only decide what courses to take with having the prerequisites for them and towards a master's program but to also create a reasonable and balanced schedule in terms of block of time, workload, and topic. I found out that a decent portion of GE10 agreed with that sentiment themselves when planning their 180 ECTS, feeling in doubt or apprehensive with the exception of, most people, including myself, being excited at the 5th semester's exchange opportunity. Additionally, it would be incredibly helpful if we were told what "popular" or recommended classes can be taken as means of giving pointers about certain paths (besides the ones mentioned in the Program Specification) or careers. For example, Linear Control 1 is recommended for those wishing to pursue mechanical engineering and may be taken alongside Electric Circuits 1. Perhaps, we could have been shown 3-year plans of DTU alumni as well as what master and career they ended up pursuing after graduation. The nature of GE is about forging your own path without a rigid curriculum while still receiving all the foundation to become an engineer; therefore, it would make sense to have a reference to what classes are recommended for what career path to be able to make meaningful choices without regretting taking a class or feeling lost. While each specification does come with program specific courses, I believe it would be helpful to know what elective or B.Eng. classes compliment the best with required B.Sc. classes. Most vectors were not deep enough in their studies to answer these doubts either.
- Information about some clubs. I feel like we should have gotten a club list about all available clubs in DTU apart from the intro fair.
- .
- No
- I found it particularly confusing how the specialisation introductory courses interacts with my schedule and ECTS. I don't feel like it was ever clarified how to choose between the specialisations and how to manage my ECTS in that regard. I have yet to be enlightened on this.
- no

- no
- Not really
- No, my Vectors are doing an amazing job!
- no
- No
- -
- Hvordan man sammensætter en god studiegruppe
- no
- No.
- No.
- no
- no
- I wish there were more information regarding the courses that I can take for my next semesters.
- No
- A more complete tour of the campus and a guidance regarding the way of finding auditorium rooms within buildings.
- No
- -
- no
- No
- Nej, og hvis der var kan man altid spørge sine vektorer
- No, I knew everything before the class started.
- Nej, synes alt var godt forklaret.
- No.
- Nej, alt fungerede fint
- No
- more convinient stuff like lockers e.t.c
- I don't think so
- Nej
- No
- No.
- No information was missing.
- Would have been nice if the vectors could brief us on how they took notes in the different introductory classes. it's a bit difficult to understand how we should study or take notes for some of these classes.
- No
- No
- No
- No.
- None at all, the vectors were super perfect.
- No, everything was perfect.
- Maybe just more info about the courses and how we can transfer/what do we do if we want to pursue a different Msc than the recommended ones.
- I feel like we needed to give a little bit more emphasis on navigating ourselves around the campus. Loads of tools available to not get lost, but still I would like a little bit more actual walking around.
- No, there was not any information I thought was missing before the classes begun.
- Perhaps some informaton on books, specializations, clubs, but I also was not present for all of the IntroDays so I might have missed some of it there.
- no

- No, I don't think so.
- I believe the information was not lacking in any way
- No.
- No, I don't think so.
- no important info was missed
- I would have liked a more completed tour around the campus.
- Not that I can think of.
- Jeg synes at det kan være svært at finde klubberne efter vi havde mødt dem den ene dag. Jeg fik ikke helt mig til mange af klubberne som jeg havde noget interesse. Jeg ved ikke hvor eller hvordan jeg kan finde dem igen ud fra at finde nogen som har en kontakt til klubben.
- I feel all the information we needed was provided at least through one medium, so nothing is missing.
- No.
- no
- No
- No.
- No
- Would have been nice to learn a bit more about whats going on around campus research, skylab and other interesting things at DTU
- As a transfer student, I felt a bit lost trying to figure out which courses to take without the help of my head of studies. But once we met I felt good about the courses I eventually chose.
- Nope

De studerende, som havde svaret, at de havde deltaget i introdagene, blev stillet 10 uddybende spørgsmål om, hvordan de samlet set havde oplevet sammensætningen af programmet for introdagene:

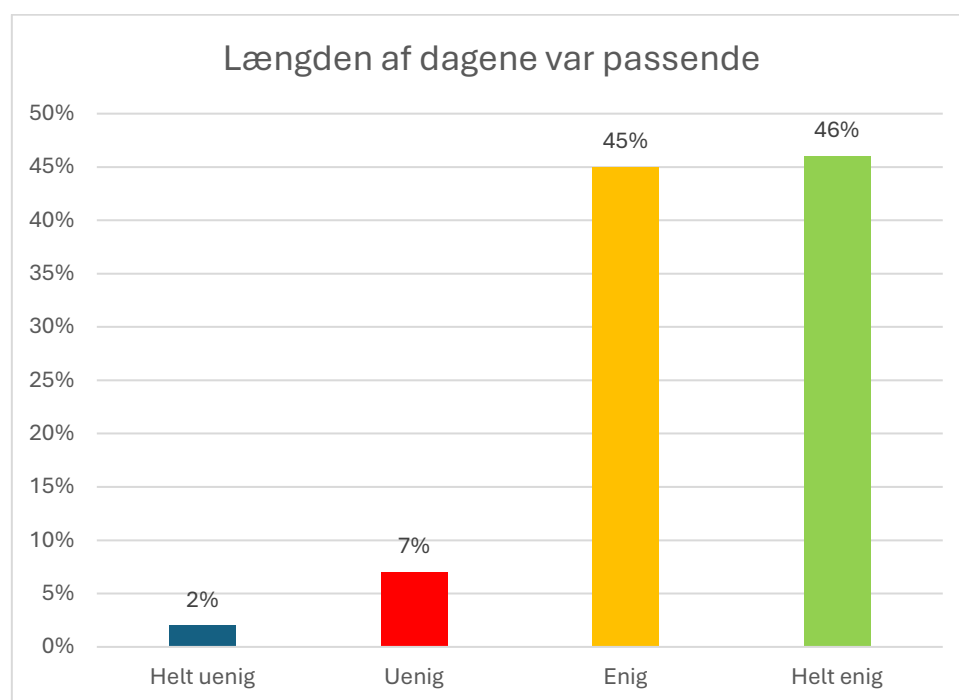

Diagram 12. Første uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

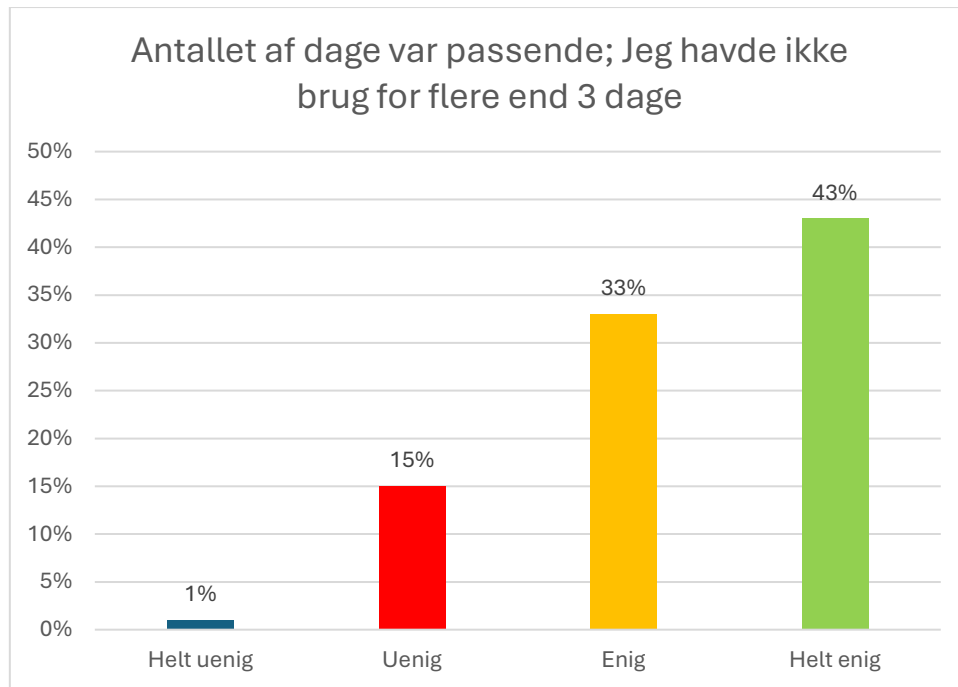

Diagram 13. Andet uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

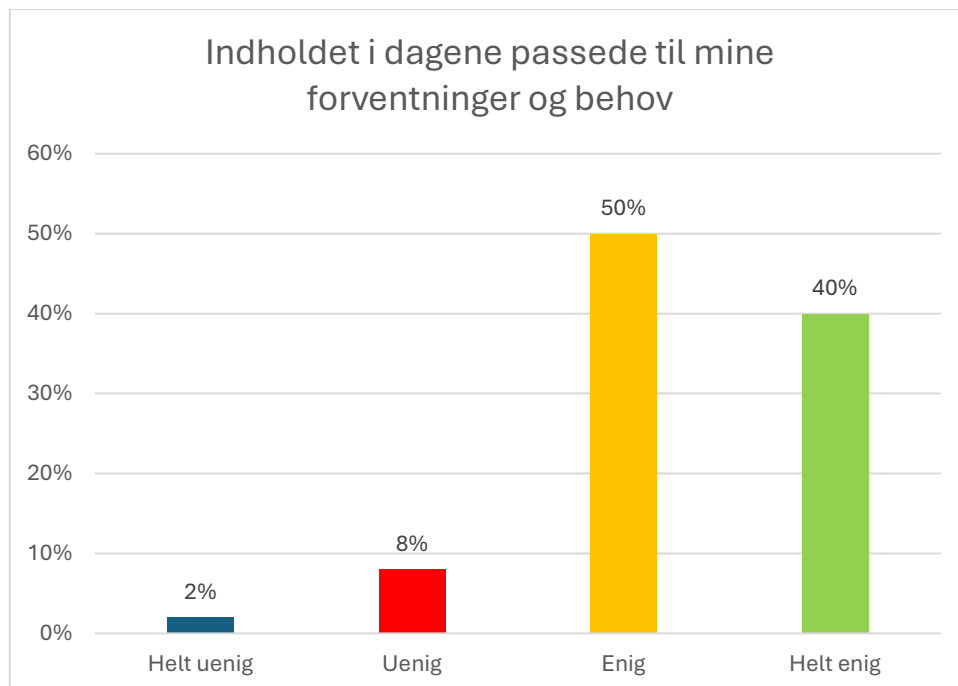

Diagram 14. Tredje uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

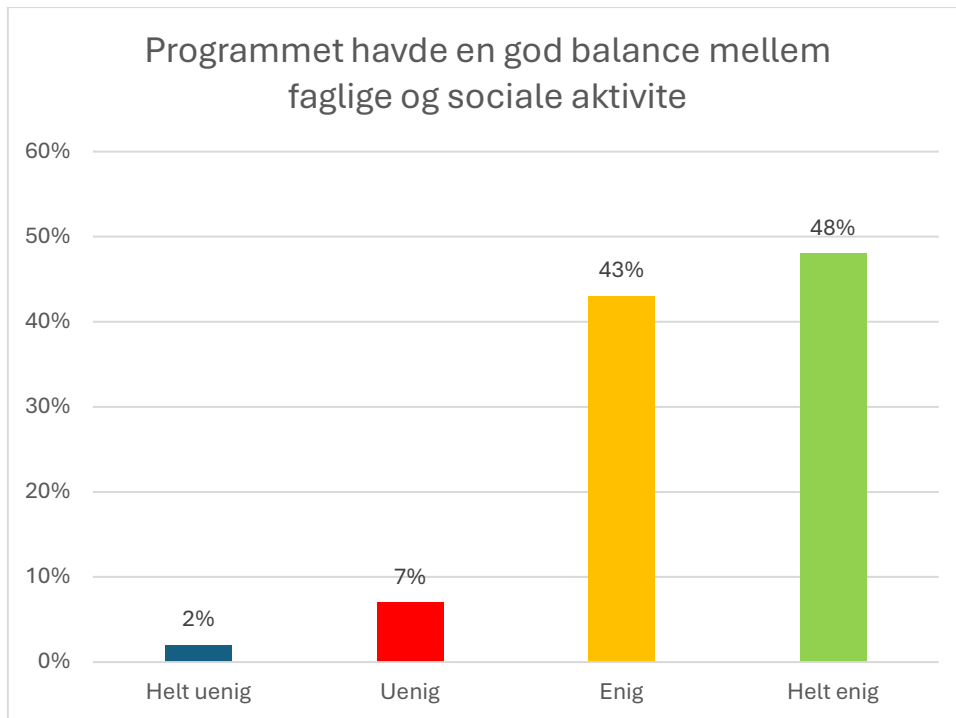

Diagram 15. Fjerde uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

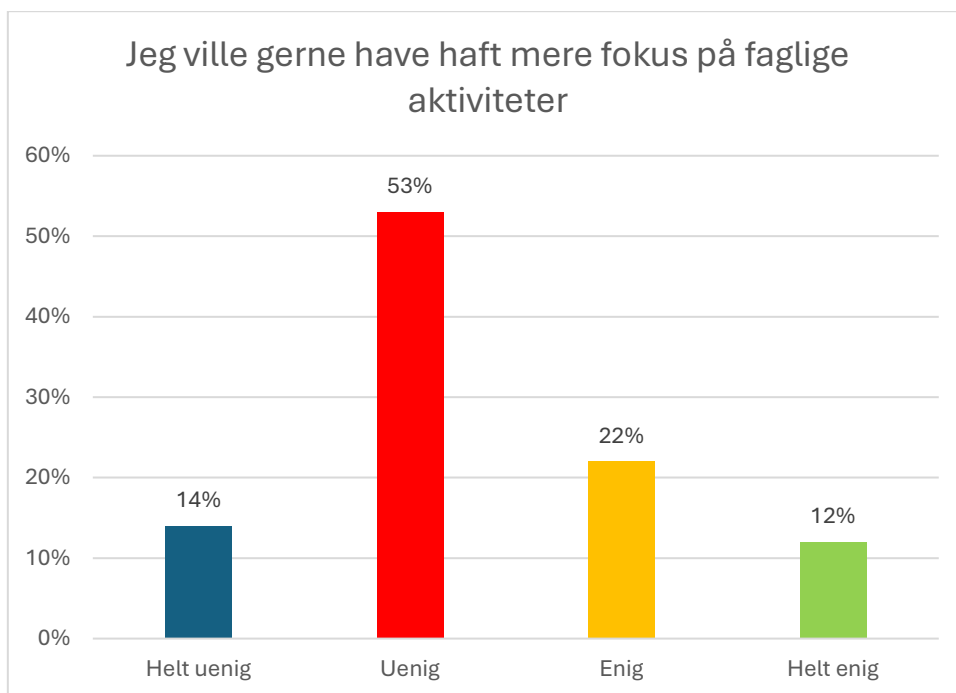

Diagram 16. Femte uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

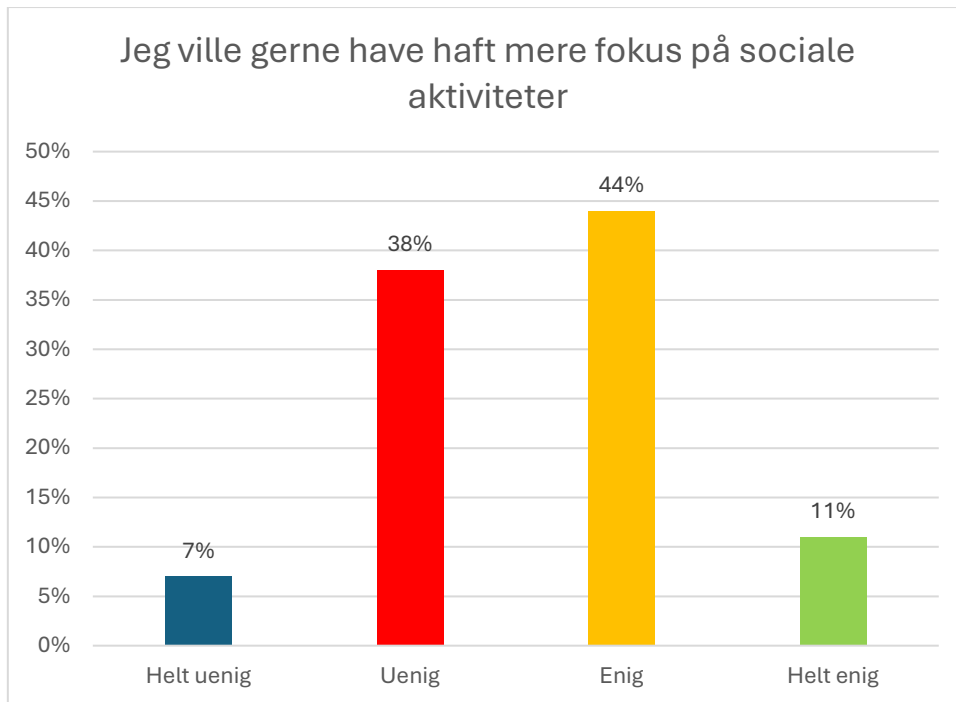

Diagram 17. Sjette uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

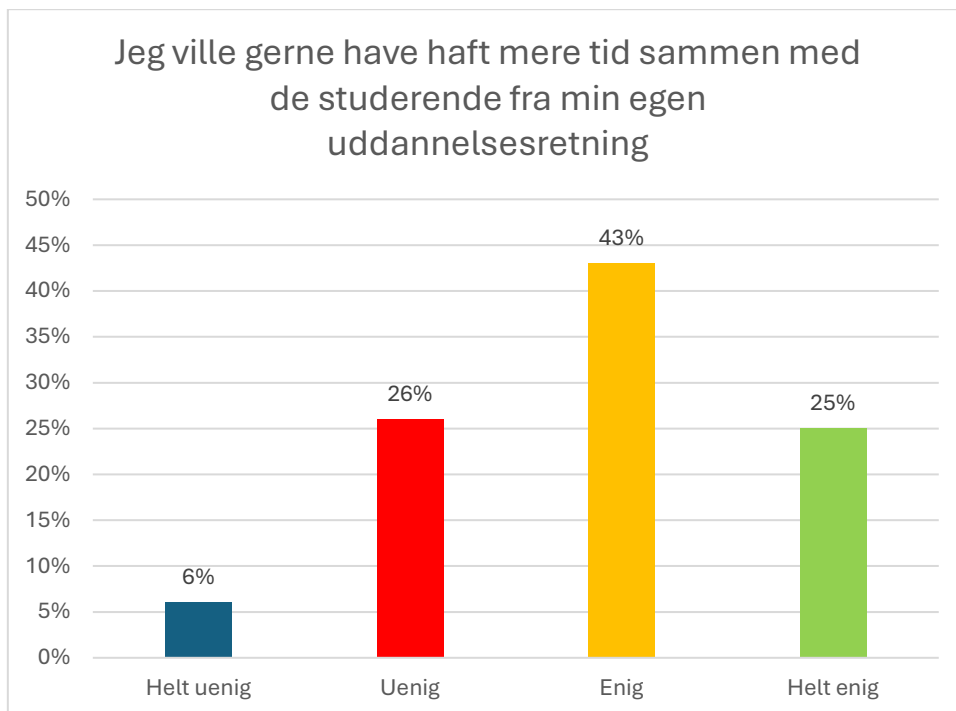

Diagram 18. Syvende uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

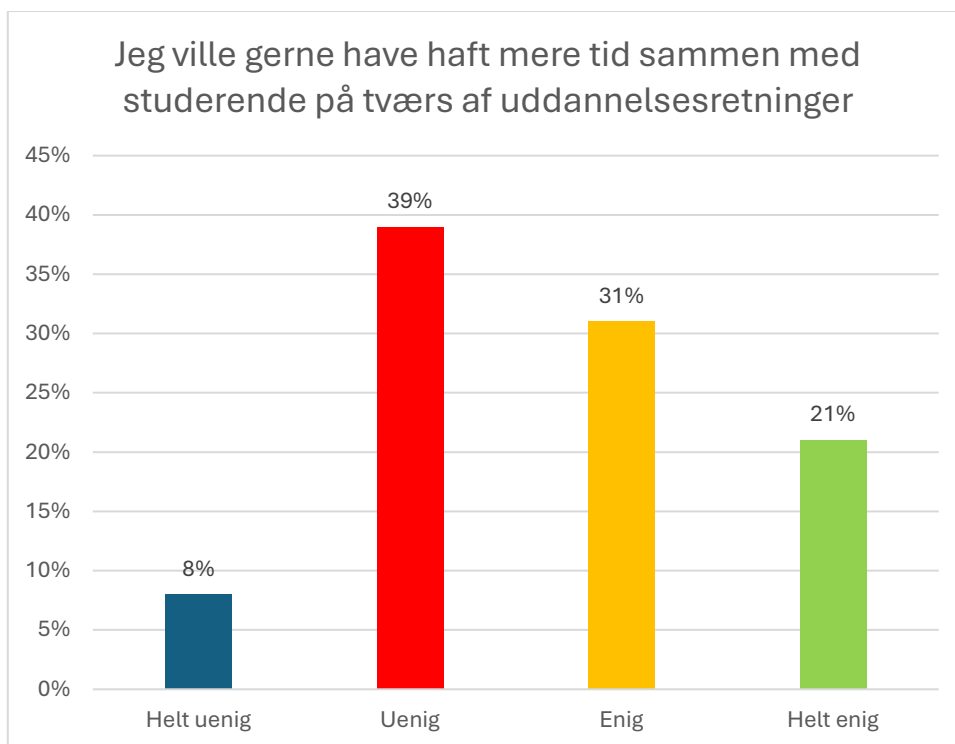

Diagram 19. Ottende uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

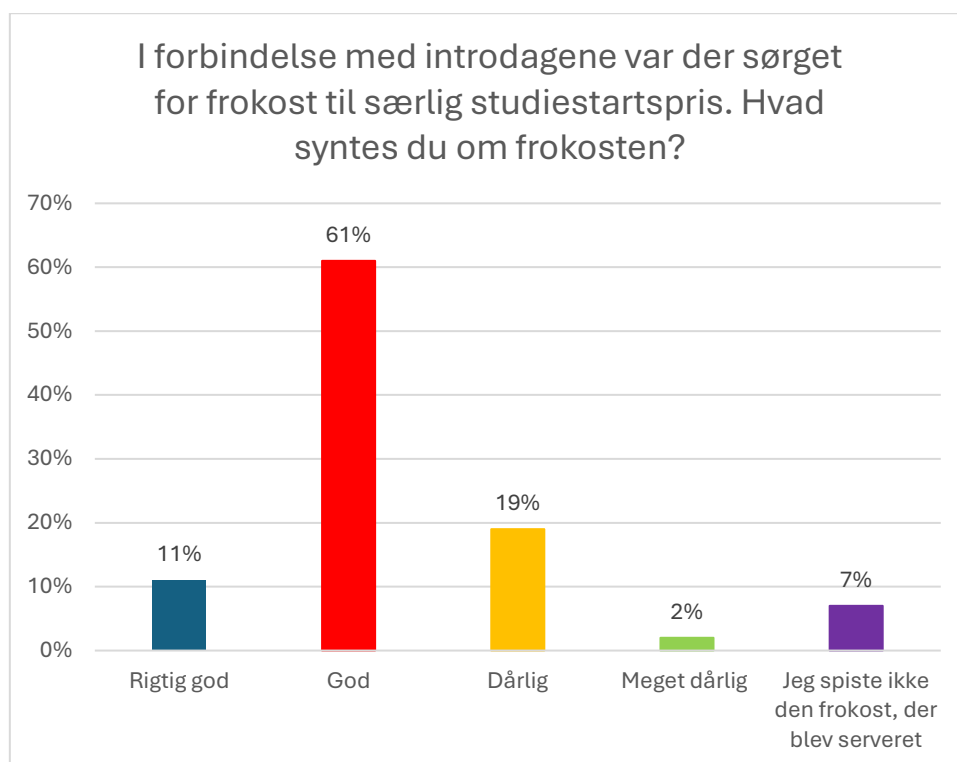

Diagram 20. Niende uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

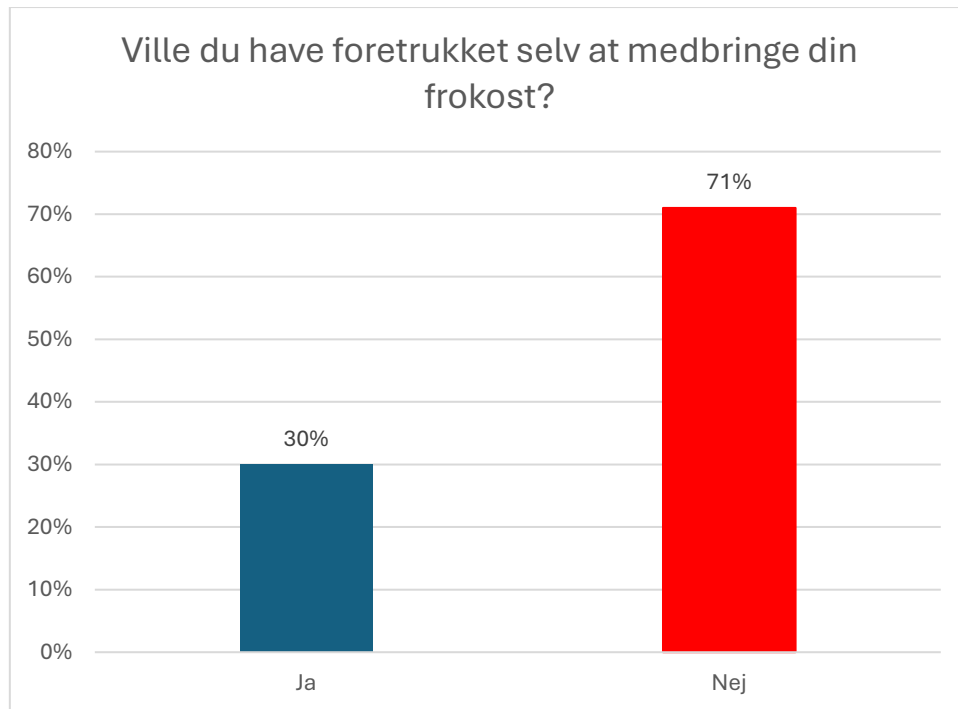

Diagram 21. Tiende uddybende spørgsmål om de studerendes oplevelse af sammensætningen af programmet for introdagene.

Den ovenstående gruppe af studerende havde mulighed for at svare på tre uddybende spørgsmål:

**Har du nogen kommentarer til frokosten, kan du skrive dem her:**

- Der kunne godt have været lidt køb, men ud over det helt fin.
- spaghetti på torsdag var jo virkelig dårlig
- none
- The curry with rice was OK, but the spaghetti was awful
- Jeg medbragte selv frokost, og kan derfor ikke kommentere på kvaliteten af den serverede frokost
- Det var god mad til prisen, men ikke noget imponerende, der var trods alt kantine mad.
- nej
- I have no comments
- Good price, however might have been slightly better quality
- I enjoyed learning about the different places on campus that offer lunch such as the various food trucks, the canteen, the Glasshall where conventions are sometimes held, and restaurants which can deliver take-out to campus.
- It was mostly bland, but not bad. Just nothing to write home about.
- Didn't like that there was no meat / fish / eggs
- No comments
- There could have been an option where the food contains meat
- Was better than what I had other days in canteen. Could have been option to have not vegan choice.
- It was all vegetarian and the food was not tasty. Another option would have been nice
- It had a good price, the food was only reasonable
- There was no clear indication that there were vegan options
- no

- The lunch could have been self-serve, so that everyone can take a portion size they can finish, in order to avoid wastage.
- Det var forvirrende at hente og betale første gang
- It
- Food was good, maybe good to add some meat options aswell.
- I saw it from other students and I think It was really good but I preferred to bring my own lunch to save up money till day one.
- no.
- Payment was a mess, since the machines for non app payment were broken.
- it tasted strangely
- Add meat
- Every day lunch was vegetarian. I would prefer to have more choice of the food on the intro days.
- it would have been nice to know exactly what we were eating on those days
- Not what was advertised, no meat & poor quality
- If possible, more alternative food varieties may be introduced with the study start price.
- I have no comments about the lunch.
- N/A.
- There should be halal food options for Muslim students, and it should be indicated which meals are halal.
- no
- no, the lunch was pretty cool.
- They were pretty good, but they could be better
- I can be a really picky eater but I really have to say that I didn't enjoy it. I understand that there is way too much people you try to feed in one go, but making food that is available for every kind of dietary need, is probably not going to satisfy the vast majority that just wants some tasty food and nothing more than that. It was kind of the talk around the table so I believe I wasn't the only one. By day three that I had already found my way around the campus a little bit, we decided to go to the Korean canteen and have food there. Sorry everyone!
- The lunch was overall great and tasted nice but i wish there were more halal options in building 101
- I really liked the special pricing, I feel like the options and food was good enough.
- the portions were really small
- I am allergic person and I didnt have any options.
- Jeg ved at nogen er ikke de største fans med hvad der var serveret men det var altså god mad.
- I would've preferred some meat.
- It was all the same texture, so it lacked substance
- The noodles were way too soggy.
- A bit expensive.
- Watery pasta sauce
- I preferd it over having to bring my own food but it wasnt great
- Thank you for having vegan options!
- Nope
- Det var ikke nok mad til mig; portionsstørrelsen

#### **Hvad fungerede særligt godt ved introdagene?**

- Clear information from my vectors
- Dancing! (And getting to know each other)

- my vectors were nice
- Getting to know many people from my course, getting to know the structure of the program and all the organizations that exist
- I was able to make some new friends and get some familiar faces.
- That we were introduced to our vectors and to people in our study line
- The vectors were very nice and the environment was very welcoming
- Jeg lagde ikke specielt meget mærke til at der var noget ekstra godt, da jeg mente at det hele var godt.
- organisation got to know people
- The making of groups
- Meeting people and vectors, who have become friends in older years.
- alt
- The vectors were really nice and very informative
- The vectors
- Good integration with the first group of people one meets (Cake groups)
- I enjoyed the "protect the egg" engineering design challenge and the rotating games, especially the one with wooden blocks where two teams try to knock each other's wooden towers without hitting the central block. Then, I liked hearing each vector introduce themselves and their chosen path as well as the head/teacher of each specialization on top of the head of studies for GE.
- I think the timing worked really well. The first day was not too long, which made it less overwhelming. Moreover, there were multiple activities that were different and fun.
- .
- While it was incredibly limit-testing to dance so much, it ended up being kind of nice and fun in the end. It was very fun to do teambuilding exercises as well.
- I met a lot of nice people.
- Good social and academic intro
- All the Vectors are incredibly sweet and helpful. It was nice to have someone guide you.
- The help from the vectors was needed. They were very clear and happy to show us new students around. It was a warm welcome.
- It was well organized, and the vectors were all extremely kind and willing to help.
- I liked the cake groups, it started some really good friendships
- Frihed til at tale og møde de andre studerende i eget tempo
- Presentations, and information received from them.
- Very good balance between having time to socialize but also getting all the info from the speeches
- good organization
- The speeches by the head of studies were really helpful
- The structure and program
- The dinamisation of the group -- breaking the ice and encouraging us to meet each other.
- The academic introduction in general seemed well planned
- Very welcoming
- everything
- The introductions for the subjects, teachers and head of studies was very helpful in getting to know the structure of the programme. Activities within the vector groups were a good way of getting to know other students.
- The atmosphere was welcoming
- Everything was really organized
- The vectors' hospitality.

- Some good social activities, meeting with students from other courses was also good. Also good information on the various clubs, and club fair was also nice.
- At man blev delt op i mindre grupper, havde en vektor til at guide én, at der var en blanding af faglige præsentationer og sociale aktiviteter, og at nogle eftermiddags/aftensaktiviteter var valgfrie. Man får et godt fællesskab og føler sig lidt mere tilpas og man blev taget godt imod.
- I felt like part of the community.
- We got to know each other very well, and we had some fun dancing but we also learned how DTU works and where the buildings in which we now study are.
- most things
- Meeting classmates
- It was good to get to know people.
- vectors were friendly but almost zero time to converse with peers. we were being put constantly into games
- Meeting new people, getting to know the basics
- Structured well with a mix of activities
- The welcoming and integration activities went well.
- I was able to meet some of my classmates which made for a smoother transition into study groups within the courses.
- The vector groups, they always made sure to include us in all of the events and parties. It was very easy for me to make friends.
- The speeches
- It was good for meeting people
- The introductory activities.
- Got to understand how the university works and how to get around
- The vector groups
- Everyone was really friendly, all the vectors tried to help as much as possible. Really nice overall.
- The structure of the day was great, I loved the balance between social and professional activities and our vectors did great. Loved all the speeches and lectures as well.
- The way one was mixed in with different people and had to solve small challenges together. One had the time and possibility to talk to people, and honestly speaking, I met many people outside my cake group by just approaching them and doing intro activities together.
- The fact that you spent a lot of time with your future classmates and that we got a good introduction to the study program.
- There were plenty of interesting activities which automatically allowed me to make new friends and I didn't even have time to worry about being alone.
- The energy of the vectors were really nice, and we were introduced to each other well
- The vectors being there to guide us and the fact that there were many activities and none of them lasted too long.
- The events were interesting and I got to socialize and meet new people from my cake group and outside of it.
- I thought that the vectors were super engaged and put in a lot of work to make the intro days really good for us. I thought the social activities were good.
- The activities and dances to get to know everyone in your cake group.
- I thought that the cake teams are a really good idea and an excellent way to start the intro days by sticking with the same people more or less, but I liked that by the end the cross team day allowed us to meet new people !!
- Det var rigtigt let at finde sin gruppe når man ankom på første dag. Jeg synes at det kan være det sværeste styk fordi man har slet ikke noget offer til det.

- It was really easy to get introduced to all the other students in the general engineering program, and right away, with the help of the cake team, I had vectors who I knew were people I came to for any information I needed. So I thought that the vectors were great.
- The dances!
- Vectors welcomed us nicely
- It's been a long time, i just know i had fun!
- Nothing special, it was ok.
- The social activities helped us to loosen up and be less nervous.
- Connecting with different students and vectors
- I liked the general set up and did feel that it helped me meet people and understand DTU both academically and socially
- I felt welcome

### Hvad kunne være bedre?

- more information about practical things
- måske en lidt bedre gennemgang af hvordan man bruger de vigtigste sider.
- Cross-programme meetings
- i think more intro days so we can socialise more
- The campus tour was lacking. It kind of just felt like a tour of all the campus bars. There was too much repetitive dancing.
- Maybe fewer presentations about information that could have been taken in at home.
- We could have done more activities
- Jeg går på GE og vi havde ikke mange i vores gruppe på tværs af linjerne der var uden for GE.
- More team games
- det ved jeg ikke
- mixing the groups more and having more people meet each other outside of their cake/buddy groups.
- Maybe we could have been to introduced to other people besides our own buddy group
- nothing
- Slightly more integration within the whole course. Perhaps another group to get to know others in the course would have been good
- I enjoyed the dances in between presentations, as it offered a social, active, and creative way to take a break, but they definitely dragged on for too long, being more like a chore than an icebreaker. Instead, I would have preferred more strategic or engineering focused tasks or games in the style of "protect the egg" as means of getting to know each other and prove ourselves. Additionally, while I believe that forming groups centered around an individual vector is fine, it also becomes isolating in a way since it restricts interaction with others. I am pretty sure I still have not met with a majority of the GE10 class, but that has improved since classes have started. Secondly, the segment concerning student organizations, especially PF, was too long and vague to be worth the amount of time spent discussing it while other parts such as the GE council, committees, and societies were not formally introduced. Furthermore, when we were given a few hours to walk through to meet with the various organizations and clubs at DTU, I did not have enough time to visit most of them due to time constrictions. Generally, I wish there was a bit more academic focus including extracurriculars since some presentations reiterated what was well described in How to DTU.
- I think that we kept doing activities with our cake group and another cake group many times. I feel like the activities could have been done with other cake groups, so we could

have met other people from the GE program. Also, I think the dancing was a little crowded and maybe we could have spread out a little more.

- .
- The cross-teams were seriously poorly mixed. I was under the impression that we would be mixed up with other study lines, but in my cross-team-group we ended up being 6 (of 7) from the same line, and only 1 who wasn't.
- Maybe spending more time with other vector groups.
- Nothing to mention
- At times it felt a little chaotic, but that's expected when you're dealing with so many new students:)
- Having a longer tour of the campus in order for us new students to better know our way around
- Nothing that I can think of.
- Maybe more time with people from other cake groups
- Der var en del spildtid, og det 'faglige' var langsommeligt og repetitivt
- Less dancing.
- More time for the introfair (we got there very late)
- There could have been more focus on the courses for the first two semesters and how to tackle them in the best way possible.
- I consider everything was good
- More planned activities in the second, and specially the third Intro day. A more complete tour around the campus (and possibly Copenhagen). I don't see why Bachelor students shouldn't have a full intro week too (like masters students do).
- During the social binding time, I think it would've been better to develop friend networks if, instead of a fully planned activity schedule, there had been more time to talk and socialize freely
- -
- nothing
- For some introduction activities, it would have been more fun if they mixed cake groups so that everyone is able to get to know more people.
- There could be more activities involving teamwork/discussions in small groups
- Nothing, it think it is perfect.
- More rest, it was kind of draining and too much at some point.
- Shouldve been a week, maybe couldve been nice to do things outside of campus socially.
- Der var alt alt alt for meget danseri. Vi dansede 6 gange per dag tror jeg. Det var sjovt med et par danse, men det blev helt vildt overdrevet.
- Sometimes we didn't know what to do exactly and there were some dead moments.
- It was perfectly fine.
- more focus on cross teams, because i'll see my classmates whole year but not people from other programmes
- a bit more hands on about the practical things, less lecture
- Too much dances which felt a bit out of place. And also too much speeches on the first day.
- more time to relax
- Food
- Maybe more mixing with other people in the same study line, more than just buddy group
- If possible the commencement of studies procedure could also be done at the end of the intro days.

- I think more time could have been dedicated to activities which allowed mingling between students. several activities were not entirely conducive to normal conversation, making it difficult to socialize during such activities.
- A lot of information overload with the speeches. Definetly could have been split over more days.
- Activities
- Maybe less dancing, and more time spent socializing
- I think all was cool.
- More opportunities to meet people in my degree
- -
- Way too much dancing, even walking around the campus a little bit would have been better and much more helpful.
- Everything during the introductory days went well.
- On one side, there could have been more academic stuff, but on the other, the intro days were meant to give us a social setting, and for that it maybe was not so important. Also we all come from different academic backgrounds.
- Our vectors were not exactly the most organized ones, and the social games they provided were pretty boring.
- I would introduce more social activities which would not be focused on talking itself, but on creating something together. This would allow new fellow students to brainstorm about the same thing and they would naturally chat just to figure the intriguing solution out.
- Perhaps slightly less dancing
- There could have been more opportunities to have a break for yourself and the cross-team activities could have been a bit more organized.
- Everything was nice!
- I think there could have been a bit more social activities within my course and with the other study lines
- Less Speeches
- One or two extra days for the intro week wouldn't hurt I feel like :)
- Jeg synes at mere af det fagligt kunne være på dag to eller dag tre. Det er fordi at den første dag er hvor mange er stadig lidt på ferie i hovedet.
- The first day of presentations was a bit difficult to completely sit through, especially when trying to befriend the people around you, so it does get a bit tough towards the end. Also, too much dancing for my taste!
- In my group on Friday, many of the people that were supposed to be in my group were absent so it ended up being a very small group, and I wish that hadn't been the case.
- More opportunities to meet first year students outside of cake group
- maybe more time with GE, students from other courses enjoyed speaking danish more so as an international student i felt a bit out of place
- Explaining the daily life and routine and how everything worked on a simpler level, everything was just a presentation that was difficult to follow.
- hele ugen
- I think the cross teams where we met people from other programs could have been better organized or more mixed.
- Nothing comes to mind
- More time with people from other courses
- Sammenhængskraften, overblikket, forudsigelighed Mere social tid og ro

De studerende, som havde svaret, at de havde deltaget i alle eller nogle af introdagene, blev stillet yderligere et uddybende spørgsmål:

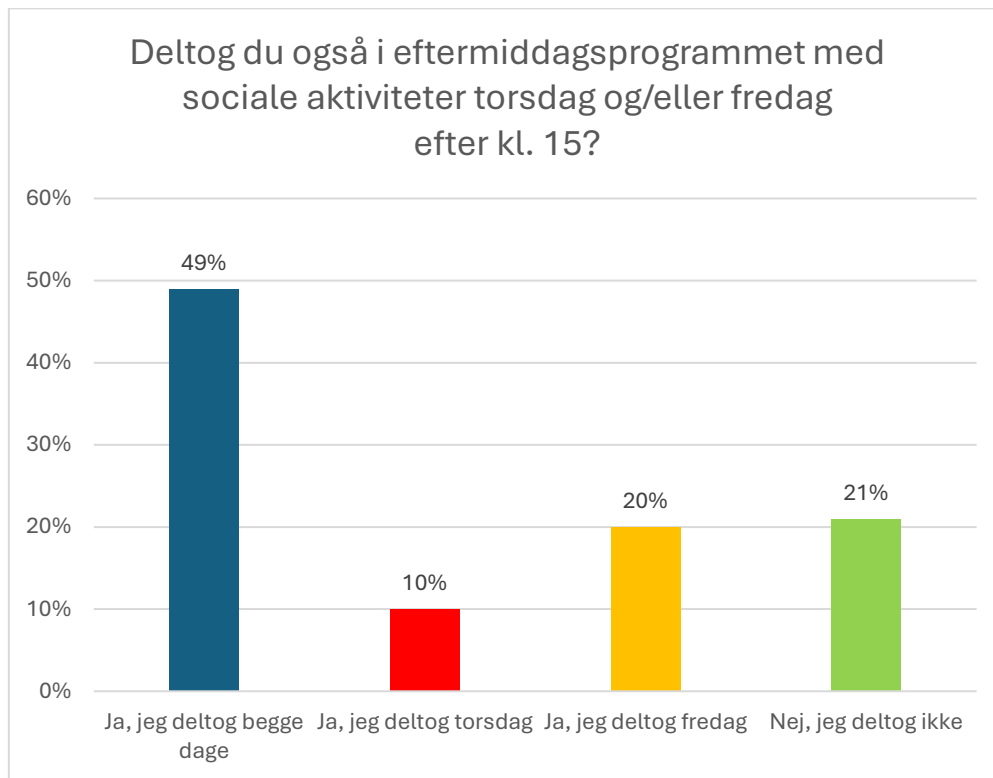

Diagram 22. Deltagelse i eftermiddagsprogrammet

De studerende, som havde deltaget i eftermiddagsprogrammet, blev stillet en række uddybende spørgsmål:

**Hvordan oplevede du eftermiddagsprogrammet? Var der f.eks. nogle af aktiviteterne, du syntes fungerede særligt godt eller som kunne have været bedre?**

- det var lidt hårdt at vide, hvor og hvornår de eneste aktiviteter skal sker
- The engineering challenges were great!
- they whre nice
- It was fun, just generic social activities
- I only really participated in the egg drop activity, and that was a fun activity and a good opportunity to socialize
- Jeg synes at det var godt nok.
- the experience was fun
- The activities where we had to work as teams so such "monster" worked really well and created a strong bond with the group (//team building)
- Everything was amazing, getting to meet sivas and just having fun, the beers were quite expensive though
- science show var fedt
- people were able to talk to people outside of their cake/buddy team which was nice and it was a more relaxed environment.
- I think it was nice. Would not change a thing
- The activities were nice and fun.

- It was fine as means to socialize and be able to talk more informally with fellow classmates.
- I enjoyed the science challenge on Thursday. It made me feel like a practical engineer as I worked with peers on the egg problem.
- The structure of the day was very unclear.
- It was fun. We went and did the infamous egg-drop-test, which is always a good time. We were mixed between cake-groups so it was nice to get to know some more people.
- Fun
- I think giving people the freedom to do whatever activity they choose worked really well.
- There is not a particular one I enjoyed. I found all them to be great opportunities to socialize
- The activities after 3p.m were useful as I thought they gave the opportunity to socialise even more.
- I kind of had a hard time figuring out what kind of activities were happening, I wish there was a guide to the students as well
- Really liked the egg throwing activity
- it was perfect.
- I feel the programme was less planned and more improvised. Having a more planned programme would have made that part of the Intro Days more engaging.
- All the afternoon programmes worked well
- I really enjoyed the "egg drop" challenge where I got to know other students in my cake group while collaborating.
- Spending time at the bars, really help to make stronger relations.
- The experience was good, and performances from the artists were quite good aswell.
- We went to netto and then to some bars, it was actually very fun and we had more time to discuss with the vectors about our studies.
- Det var super sjovt og man fik udvidet det sociale netværk
- everything was alright
- Was fun
- No, everything was good there.
- it was good. nothing special
- It was good, paired well with the programme
- Egg drop was a fun activity
- I think the engineering activities were fun. There could be an introductory meeting for people who are planning to work during their studies.
- the afternoon program was very nice; it provided a very natural environment in which I could get to know my classmates. I do not have any particular comments on what could or could not have gone better.
- All activities worked well.
- The afternoon program was great.
- Great opportunities to meet different people was amazing
- I liked the party
- It was just like going out with friends for drinks. Really nice and chill environment.
- I loved the fact that our vectors are so dedicated to their part and made us feel welcomed.
- I think the programme was generally good.
- I think the best thing was just hanging out and talking to the people. I went to the Science show (to the one time slot that was supposed to be in English), but they have decided to do it in Danish anyways, which disappointed me.
- I had a lot of fun.

- I think just sitting around with vectors and friends without strictly following a program like earlier in the day was nice.
- I thought some of the activities were maybe a little boring but the initiative was good
- I really liked all the activities.
- I thought the egg drop was quite fun; however, it could have been more organised and streamlined, but it was still fun working with random people from my programme. I thought the intro party was also really fun.
- I would've liked more board games.
- It was relaxed and did not follow a specific plan (which is good for this type of socialisation). I got to know first year students and vectors better.
- det var hyggeligt, det der fungerede godt var at det var frivilligt at deltage.
- It was ok.
- I liked them! Helped me meet everyone socially

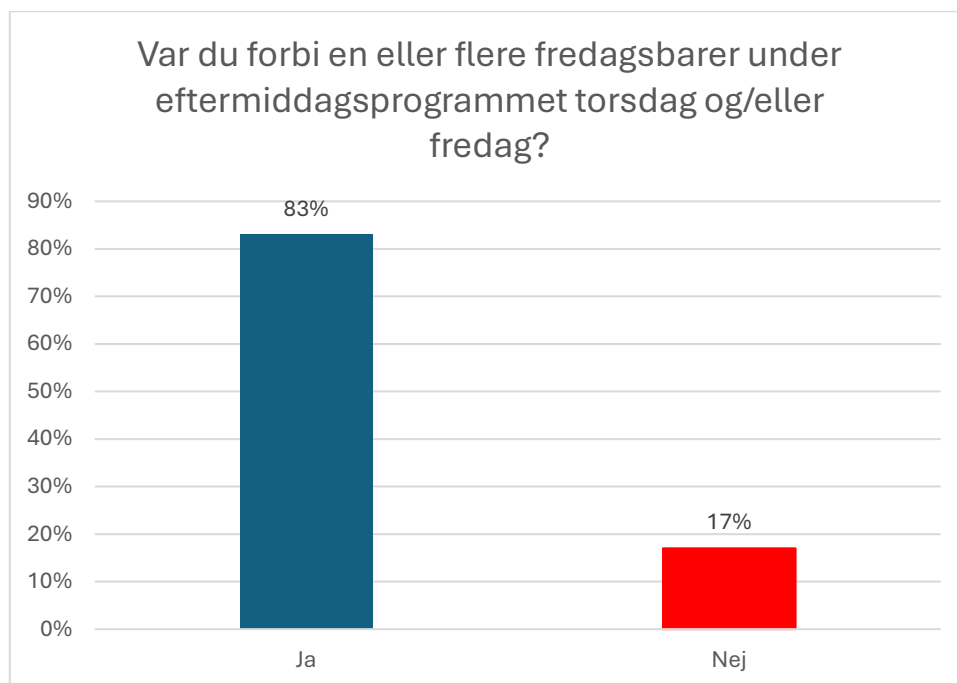

Diagram 23. Besøg i fredagsbarer torsdag og/eller fredag

De studerende, som have besøgt en fredagsbar, blev stillet uddybende spørgsmål:

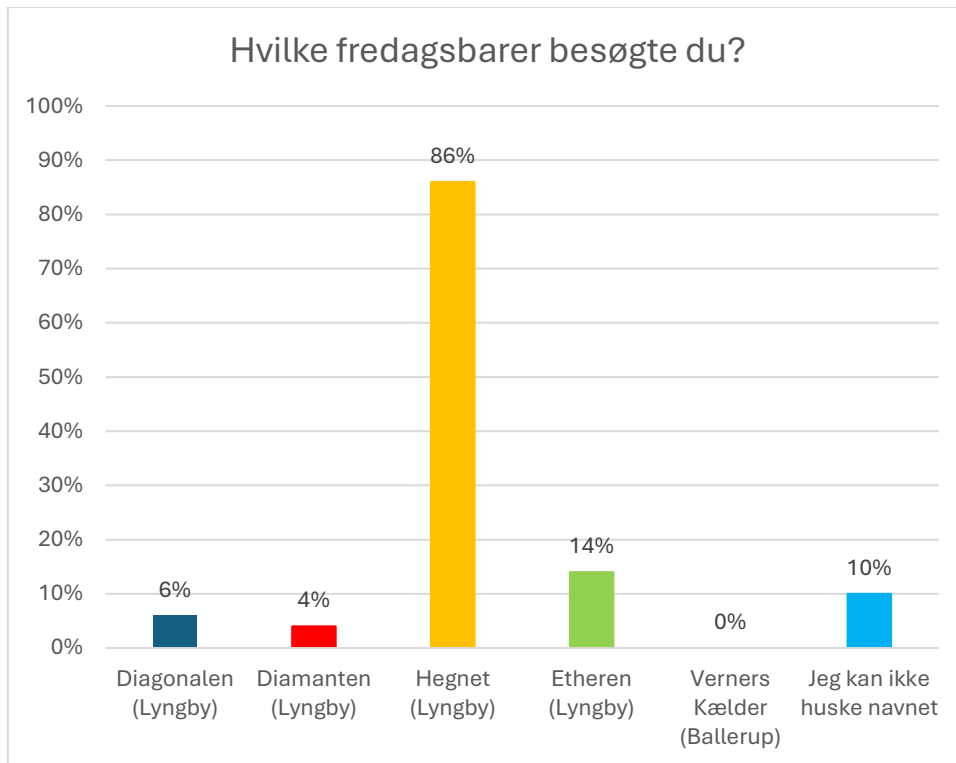

Diagram 24. Oversigt over besøgte fredagsbarer

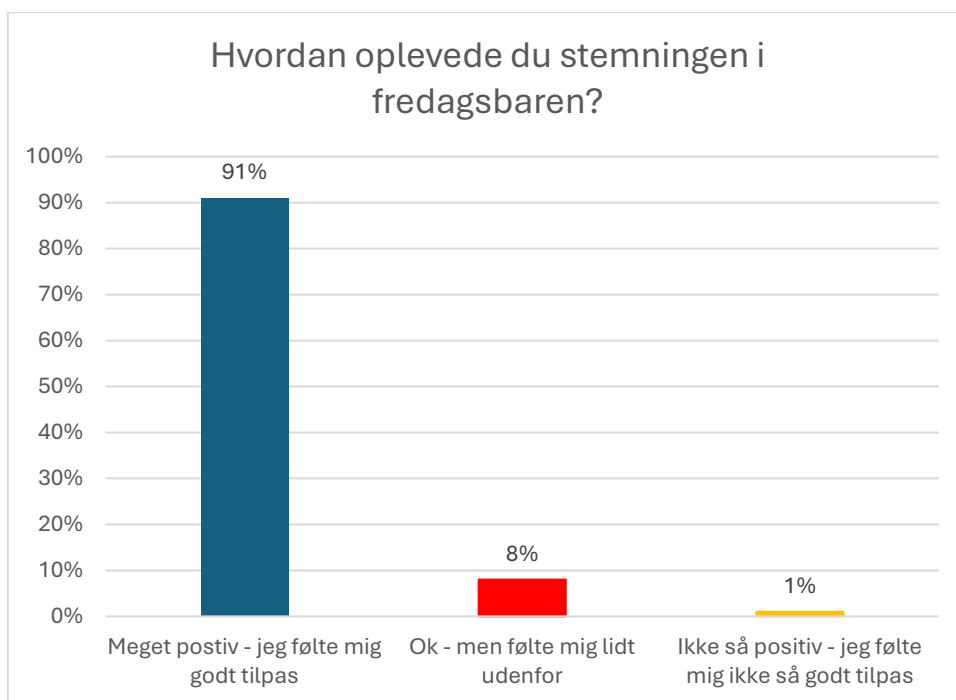

Diagram 25. Stemningen i fredagsbaren

6 studerende svarede, at de følte sig lidt udenfor. De havde mulighed for at svare på et uddybende spørgsmål:

### Hvad var det der fik dig til at føle dig lidt udenfor?

- I don't drink alcohol
- people speaking in danish
- I don't speak danish

En studerende svarede, at vedkommende ikke følte sig så godt tilpas. Denne studerende havde også mulighed for at uddybe sit svar:

### Hvad var det der fik dig til at føle dig utilpas?

- I only went to meet up with my friend (whom I've known since high-school). I generally don't like clubs, bars, etc. but I got the feeling that other people had fun. In other words: it's not you, it's me.

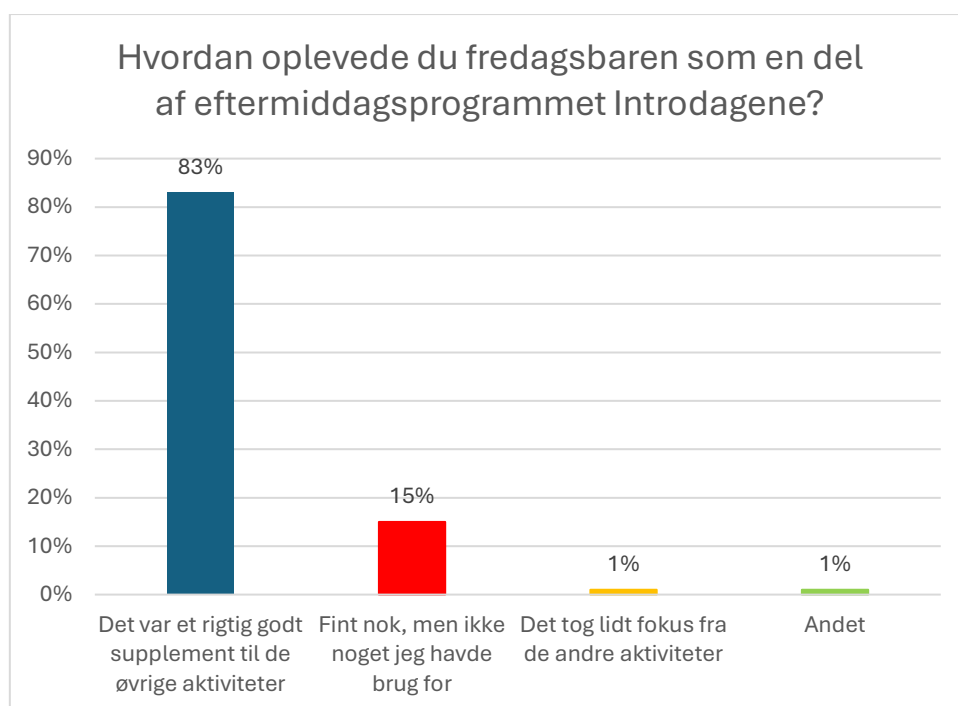

Diagram 26. Fredagsbaren som en del af eftermiddagsprogrammet

Den ene studerende, som havde valgt svarmuligheden 'Andet', havde mulighed for at uddybe sit svar, men det har vedkommende valgt ikke at gøre.

De 16 studerende, som ikke besøgte en fredagsbar, blev ligeledes stillet uddybende spørgsmål:

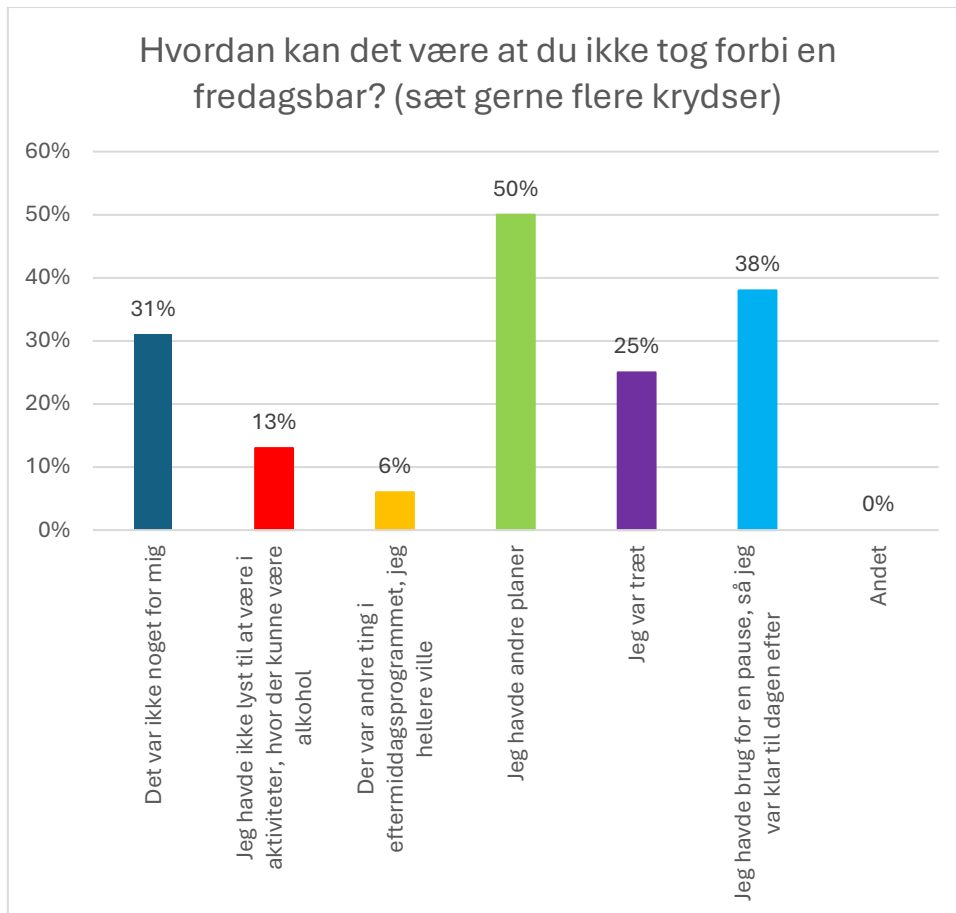

Diagram 27. Begrundelse for ikke at besøge fredagsbar

De studerende, som slet ikke havde deltaget i eftermiddagsprogrammet, blev ligeledes stillet et uddybende spørgsmål:

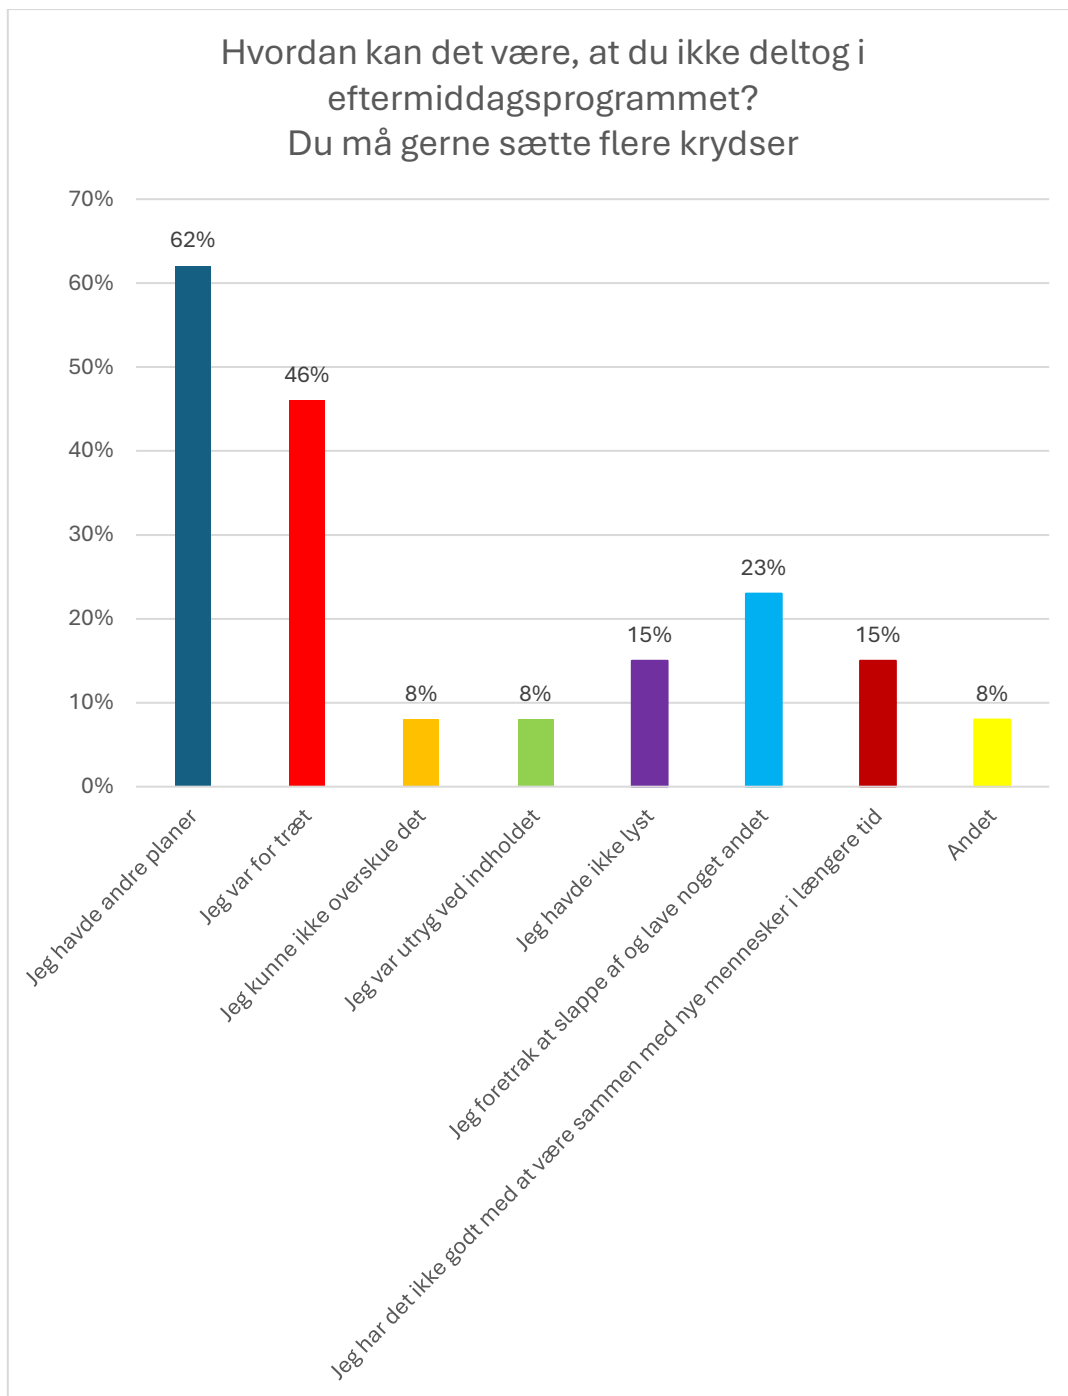

Diagram 28. Begrundelse for manglende deltagelse i eftermiddagsprogrammet

Alle de studerende blev dernæst spurgt, om de deltog i DTU Introfest fredag aften:

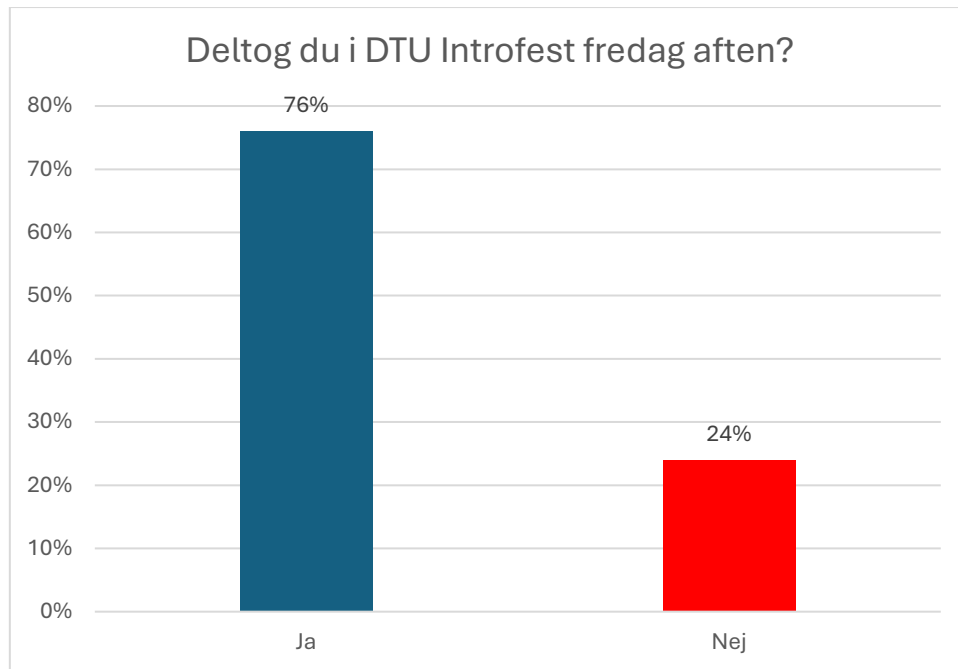

Diagram 29. Deltagelse i DTU Intروفest

24% af de studerende svarede, at de ikke havde deltaget i Intروفesten. De blev stillet et uddybende spørgsmål:

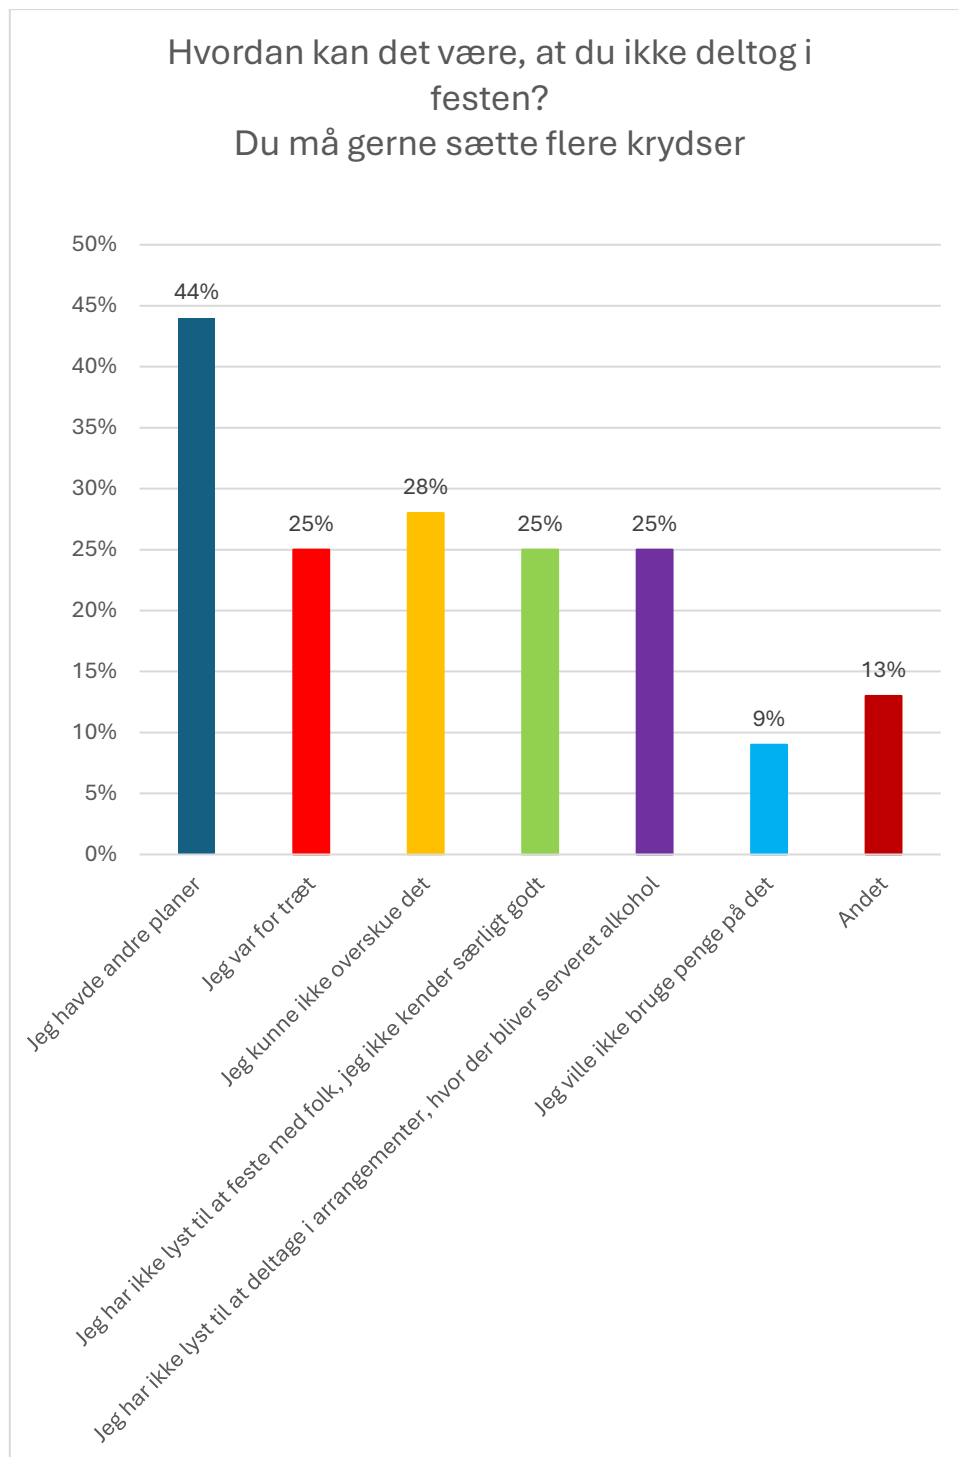

Diagram 30. Begrundelse for manglende deltagelse i DTU Introfest

76% af de studerende havde deltaget i DTU Introfest. De blev stillet nogle uddybende spørgsmål:

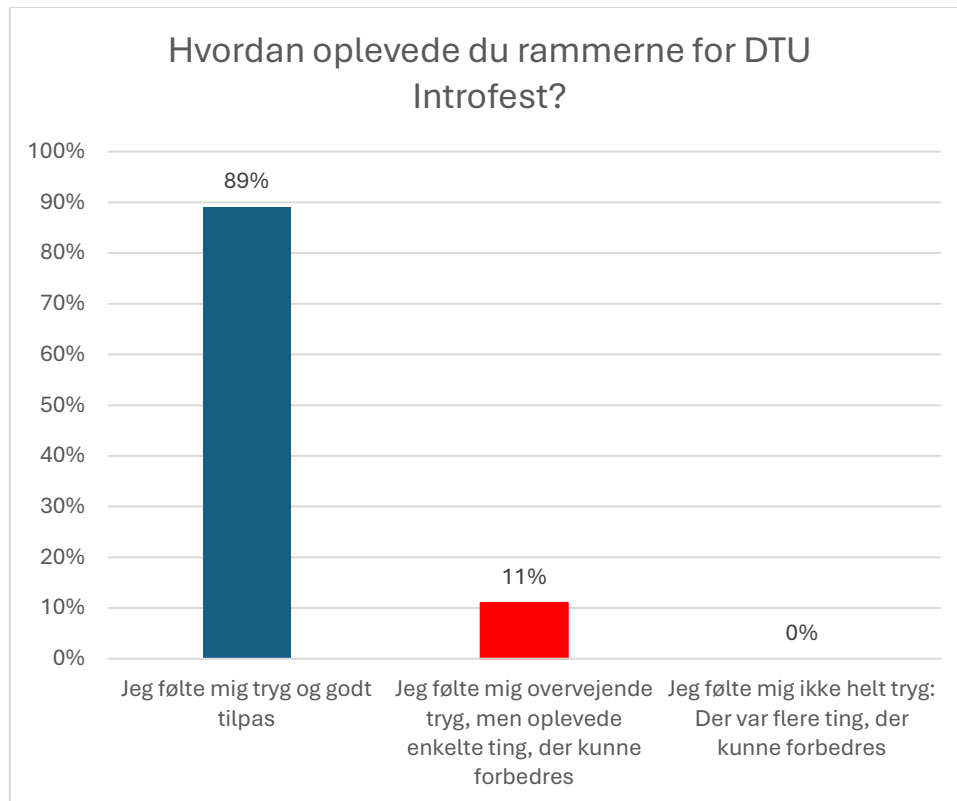

Diagram 31. Oplevelse af rammerne for DTU Introfest

#### Har du kommentarer til festen, kan du skrive det her:

- No comments
- Everything was amazing but beer quite expensive
- nej
- It was a bit overwhelming finding my way around campus during that week, especially meeting with other GE students, but I ended up finally getting there :) The service, food, and drinks were quality and added to the fun.
- I especially liked the appearance of SIVAS at the party. It was very much a highlight of having such a well-known artist perform live.
- No comments
- No comments
- Maybe play more english songs, so that non-danish students can enjoy it a little bit more as well
- -
- no
- Overall, it was good
- good performances.
- Helt vild fed fest.
- It was good but I left the party very early because It was my first time alone in the night in a different country and I was scared of coming home late and not finding the right way. I left early the party also because I was feeling a little bit alone among a lot of new people.
- No comment.
- Music choice was so so
- no comments
- It was fun!
- No specific comments.

- N/A.
- All good from my side
- It was really fun! I was pleasantly surprised by the bands invited. I also had a fun time dancing, and even met a few new people from my course that I speak to a lot now.
- I think it was a good balance between music and conversation spaces, I liked it.
- It was awesome.
- It was really cool to discover Danish artists even though I never heard of them, and the atmosphere was really nice !
- Super fun, I liked that there was live music! It would have been fun to have some karaoke as well!
- I would have liked clearer information on when each artist would be playing
- No comments
- I may have missed it, but it could have been more obvious that we needed to log into learn on our phones before being able to enter.
- Great time! 10/10
- Very fun

De11 studerende, som havde svaret, at der var ting ved DTU Introfest kunne forbedres, havde mulighed for at uddybe deres svar:

**Du må meget gerne uddybe, hvad der kunne være bedre:**

- Der var en der blev meget fuld og blev mere og mere aggrasiv på danse gulvet og ender med at smide en person ned i gorilla hagnets gulv så han slår hul i hagen. undervejs og efter var vagterne ikke tilstede. Da den anden var kommet til skade måtte vi selv sende ham til 'læge'. vagten kiggede bare på os ( vi stod forrest )
- more bars
- Det var svært at finde dem, man havde lært at kende.
- maybe a guard close to the bathroom as i saw some guys going kind of into the women's area. also maybe a couple more guards in the area outside the sports hall, so people feel safer
- Security could be walking over campus more, less lines in the bars.
- Jeg føler mig generalt ikke særlig tryk med fulde ukendte mennesker, men det var godt at man kunne havde det sjovt, og at der var tillidspersoner man kunne komme til hvis der var behov for det.
- There was a guy who followed me around.

Alle de studerende blev spurgt om, hvorvidt de havde deltaget i Polyteknisk Sommerhygge om lørdagen:

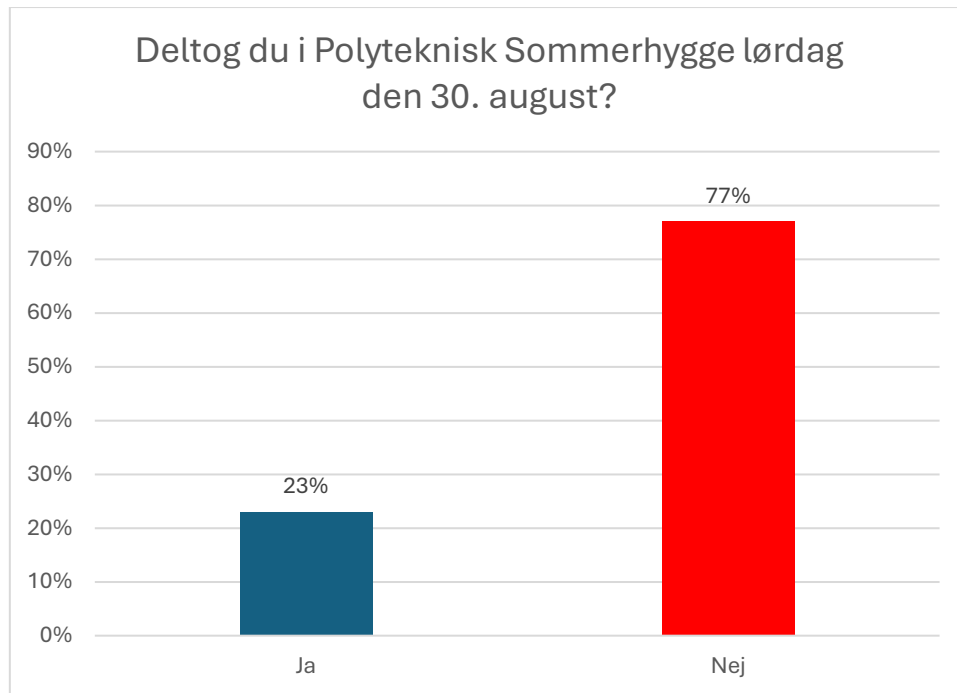

Diagram 32. Deltagelse i Polyteknisk Sommerhygge

77% af de studerende svarede, at de ikke havde deltaget i Polyteknisk Sommerhygge. De blev stillet et uddybende spørgsmål:

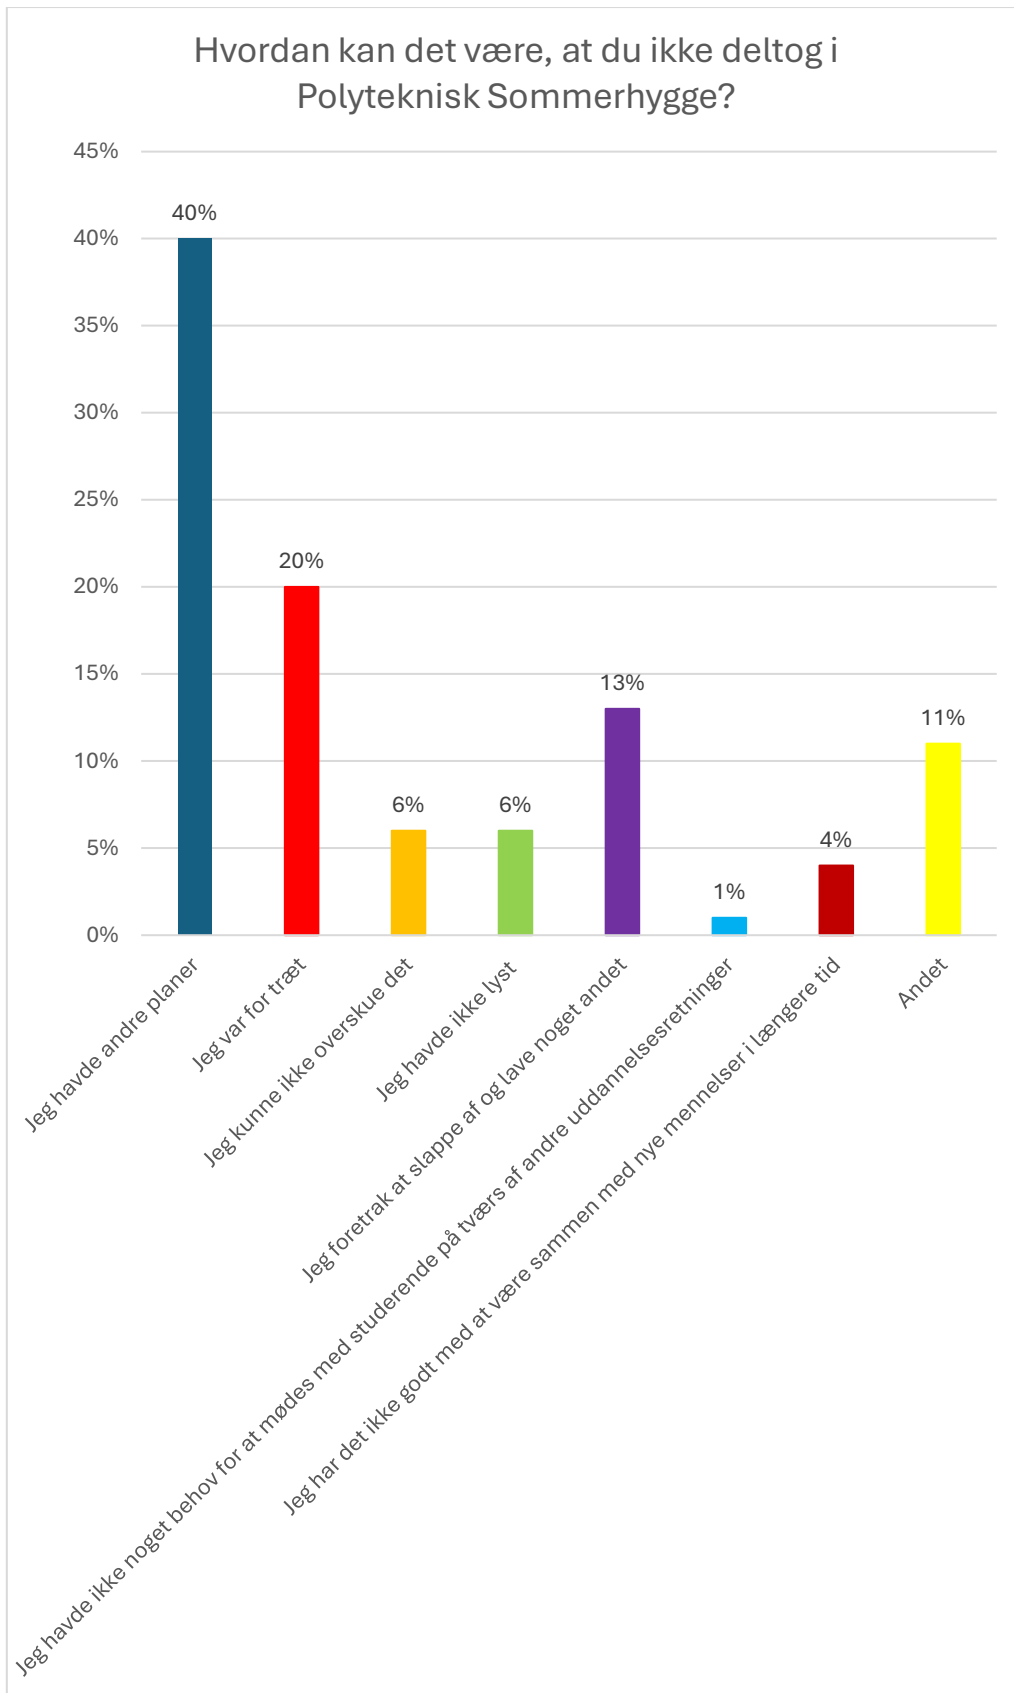

Diagram 33. Begrundelse for ikke at deltage i Polyteknisk Sommerhygge

23% af de studerende svarede, at de havde deltaget i Polyteknisk Sommerhygge. De blev stillet en række uddybende spørgsmål:

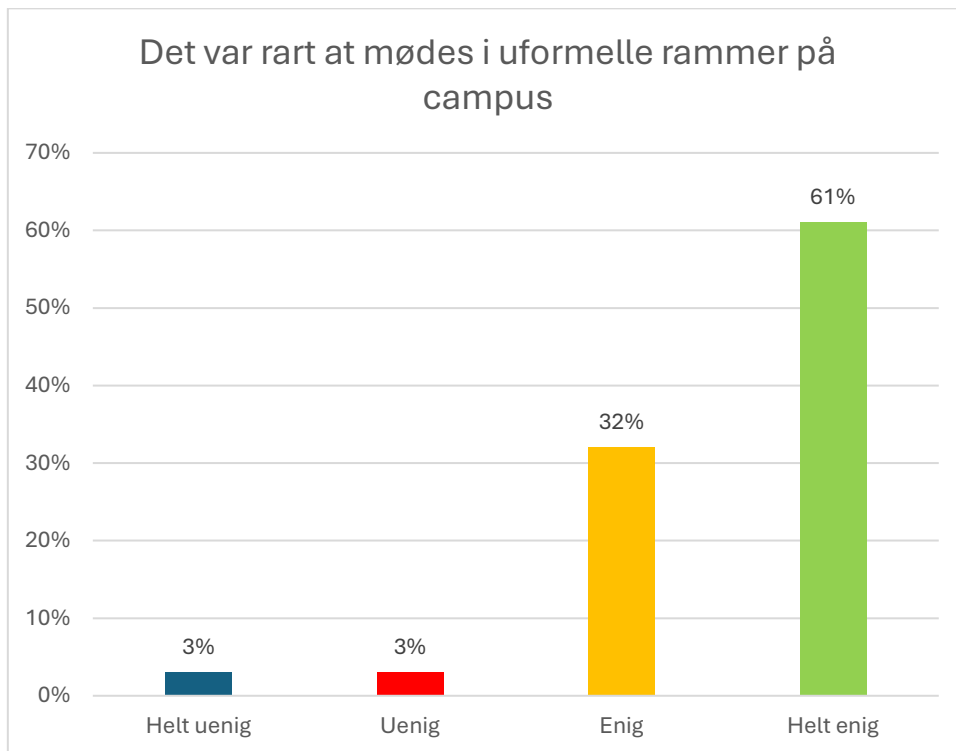

Diagram 34. Første uddybende spørgsmål om oplevelsen af Polyteknisk Sommerhygge

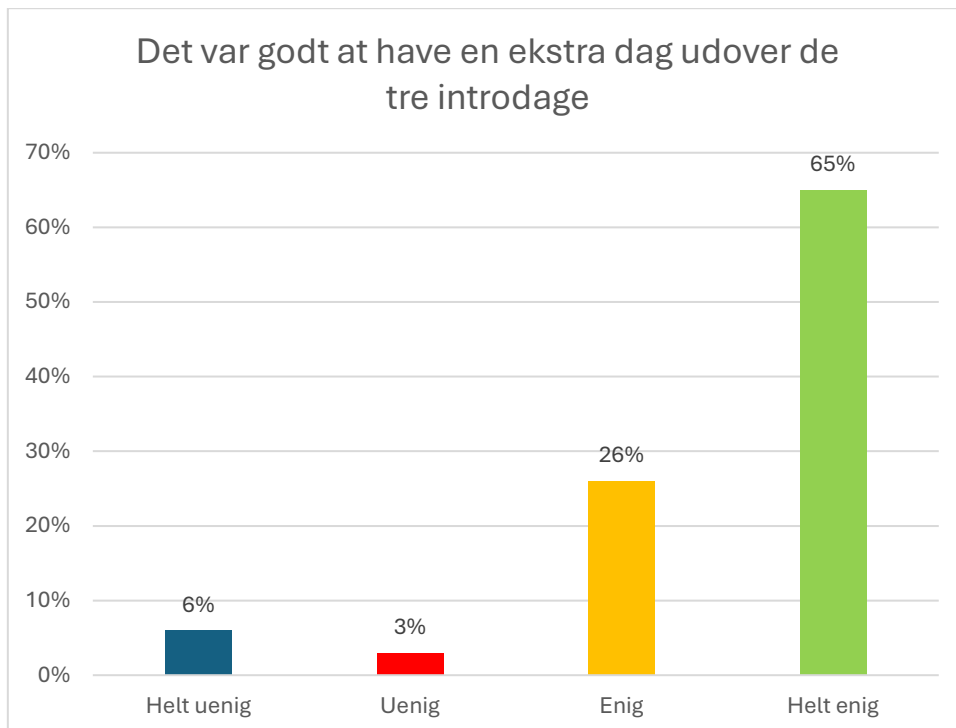

Diagram 35. Andet uddybende spørgsmål om oplevelsen af Polyteknisk Sommerhygge

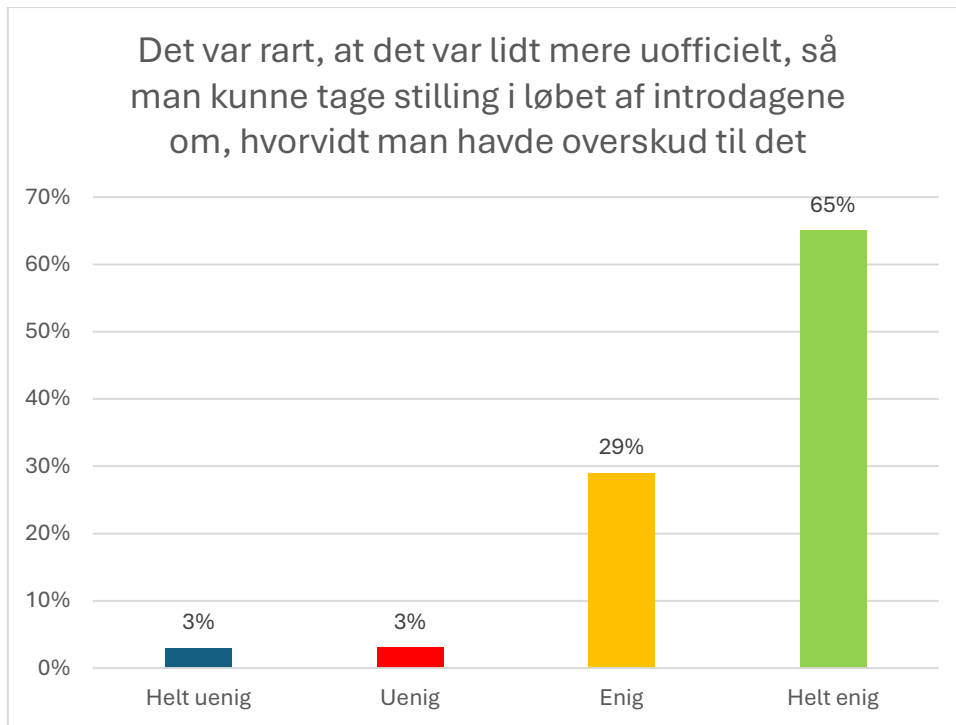

Diagram 36. Tredje uddybende spørgsmål om oplevelsen af Polyteknisk Sommerhygge

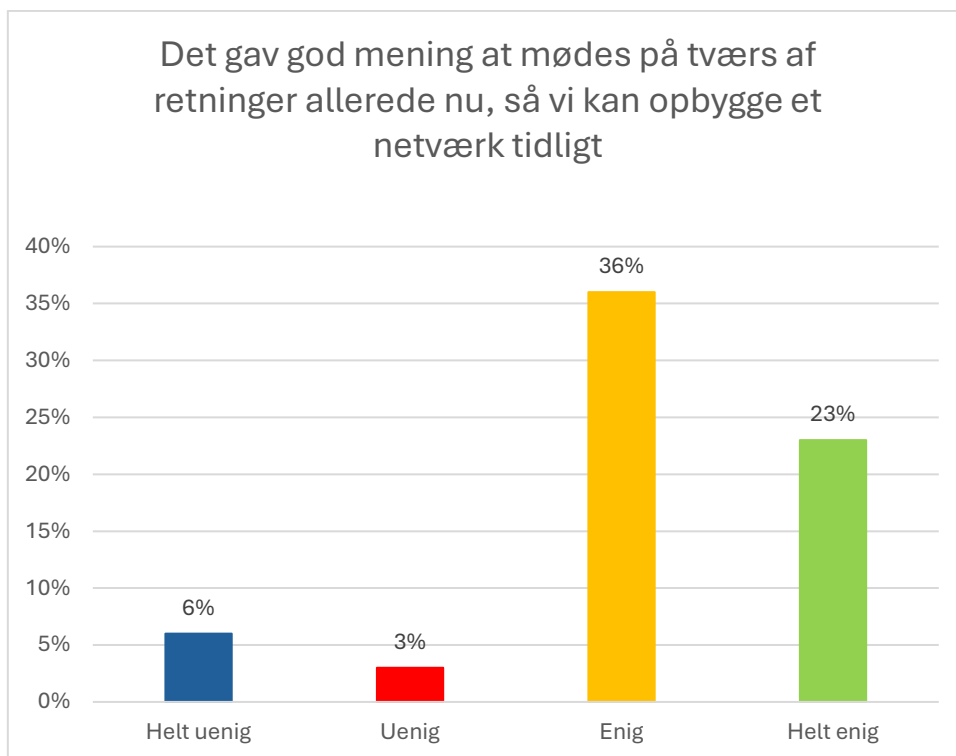

Diagram 37. Fjerde uddybende spørgsmål om oplevelsen af Polyteknisk Sommerhygge

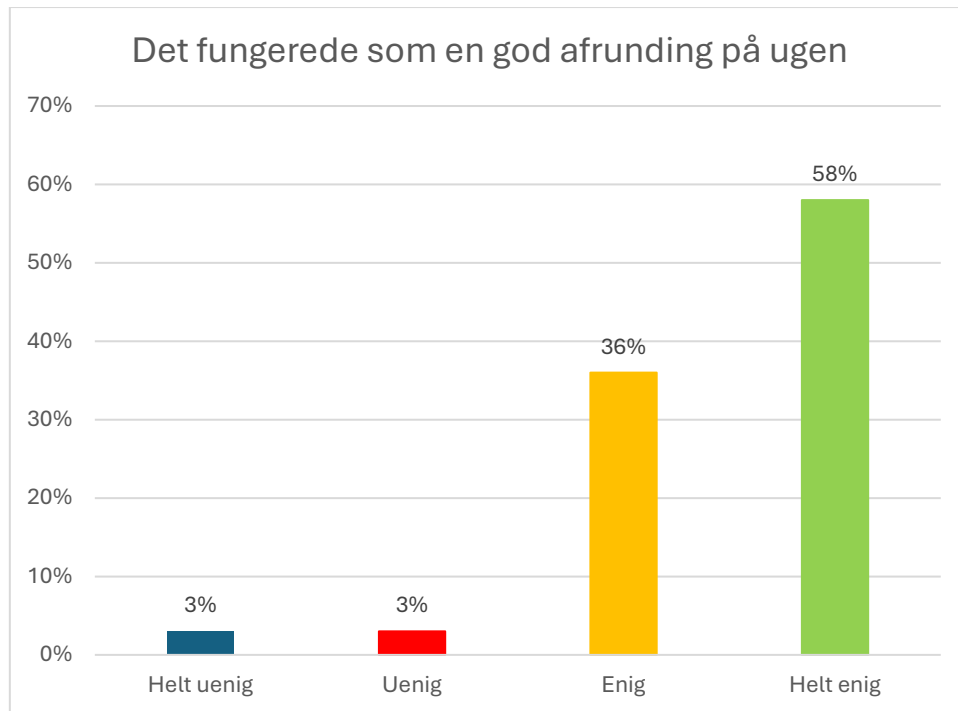

Diagram 38. Femte uddybende spørgsmål om oplevelsen af Polyteknisk Sommerhygge

De studerende, som havde deltaget i Polyteknisk Sommerhygge, havde mulighed for at skrive kommentarer til arrangementet vha. et fritekstfelt:

**Har du nogle kommentarer til Polyteknisk Sommerhygge, kan du skrive dem her:**

- no
- Very chill event. Played frisbee and made some more friends from my program that I somehow hadn't met in the intro days
- det var lidt kedeligt
- In my opinion, I thought it was strange for us to meet people from other study programmes all the way at the end of the intro week since I would probably not run into those people again. I felt like it took the opportunity to get closer with other GE students. Not only that, but most cross groups would speak in Danish and not bother including internationals, going against the very concept of GE.....
- Maybe it could have been in the afternoon so that people wouldn't have to wake up that early after the party
- True content of "Polytechnical Summer Fun" could have been better communicated, so I would not waste my time on it.
- Really liked it, not many people showed up so I feel like it could have been advertised more.
- Der var virkelig få der kom og det virkede ikke organiseret.
- It was really fun!
- I met some really nice people there, the whole thing felt chill and fun at the same time, and we also had lovely pizza afterwards. It was amazing.
- I would have liked to see more people participate that day.
- It was my favorite intro day because it was unofficial, I wish some of the other days were more like that.
- Because fewer first year students went, I got to know the vectors better
- I wouldve liked to meet more different study programs

- Nope

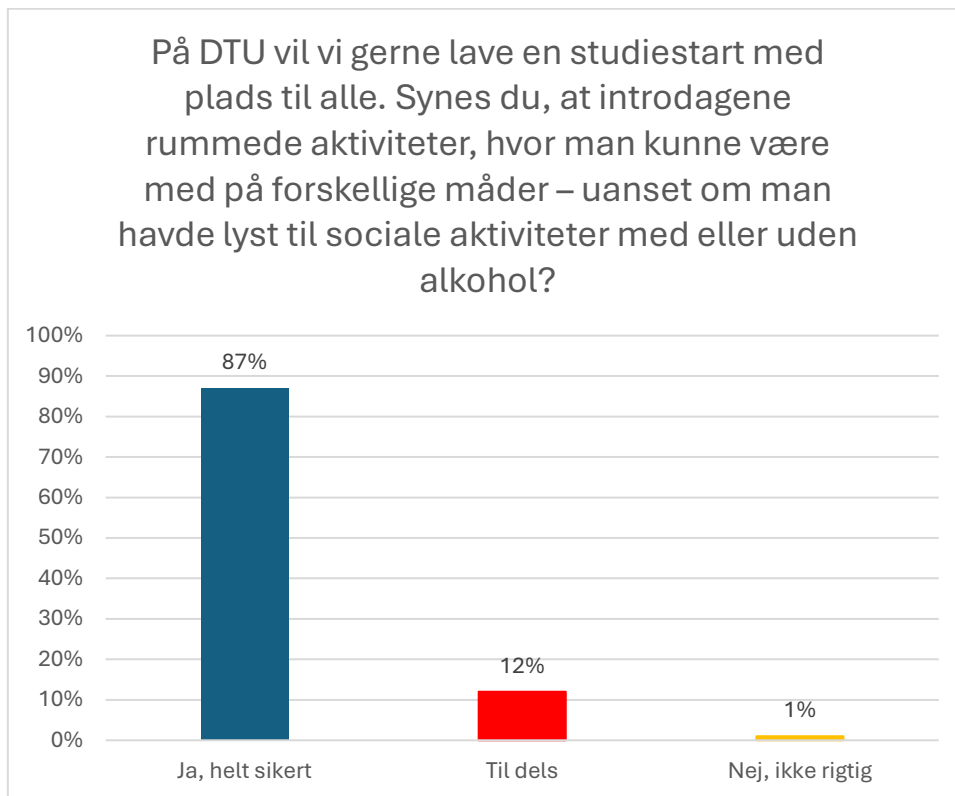

Diagram 39. Oplevelsen af inklusion i introdagene

16 studerende svarede, at introdagene til dels eller ikke rigtig rummede aktiviteter, hvor man kunne være med på forskellige måder. De studerende havde mulighed for at uddybe deres svar:

**Hvis du har nogle forslag til hvordan vi kan gøre programmet mere rummeligt til næste år, må du meget gerne skrive dem her:**

- no
- Maybe try adding more variety the activities.
- There was too much of the same activity: dancing. Although its nice, I think the intro days could have been a bit more creative and fun.
- I don't know, I was just overwhelmed.
- Selv vil jeg gerne være med trods at jeg ikke drikker, men jeg kan SAGTENS forstå dem som for hvem det føles utrygt. Særligt på vores linje er aldersforskellen også et afgørende element; nogle af de studerende er enormt unge.

Hernæst blev de studerende spurgt ind til det online studiestartskursus 'How to DTU', som de bl.a. var blevet henvist til i deres optagelsesbrev:

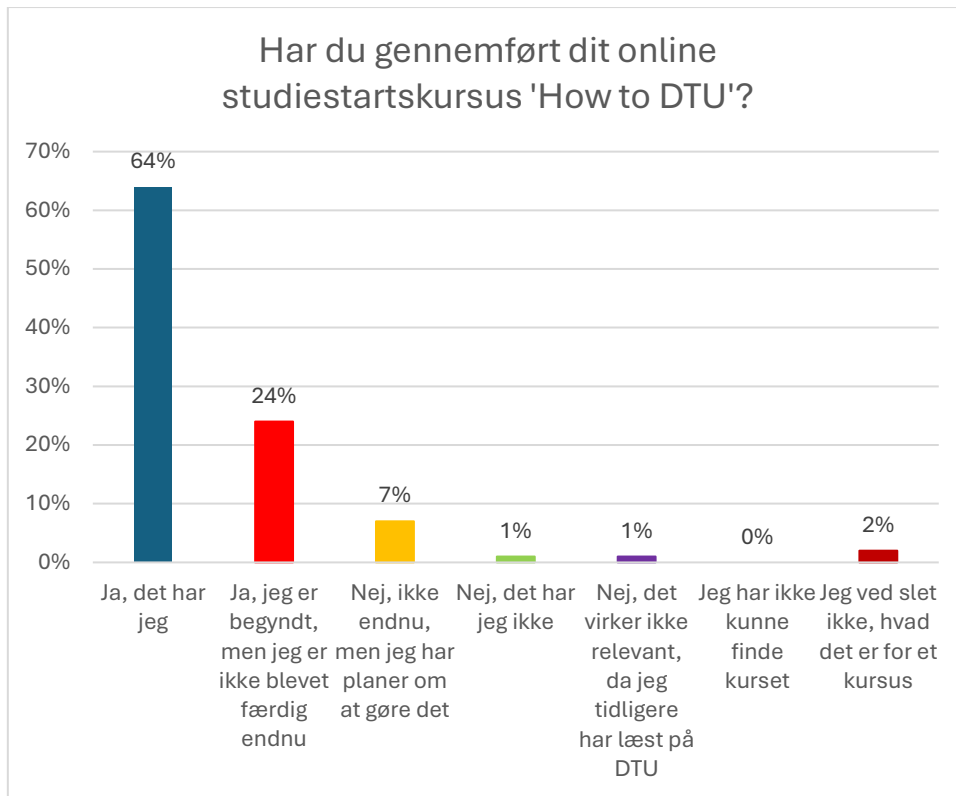

Diagram 40. Gennemførelse af 'How to DTU'

Samlet set svarede 88% af de studerende, at de havde gennemført 'How to DTU', eller at de var begyndt. Denne gruppe studerende blev stillet 7 uddybende spørgsmål om kurset:

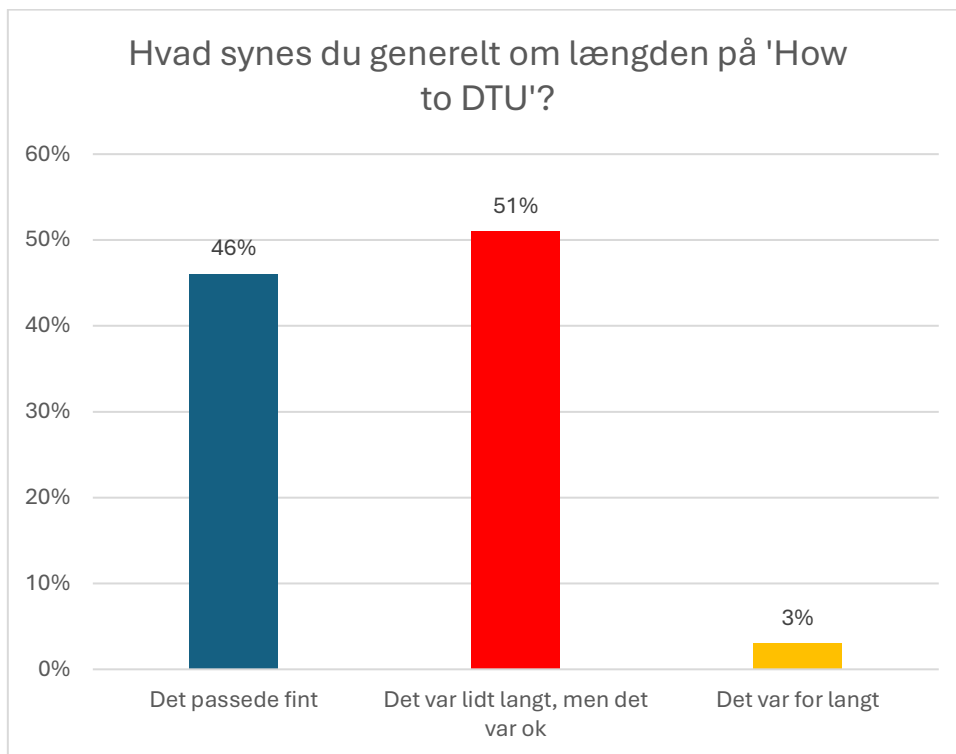

Diagram 41. Første uddybende spørgsmål om 'How to DTU'

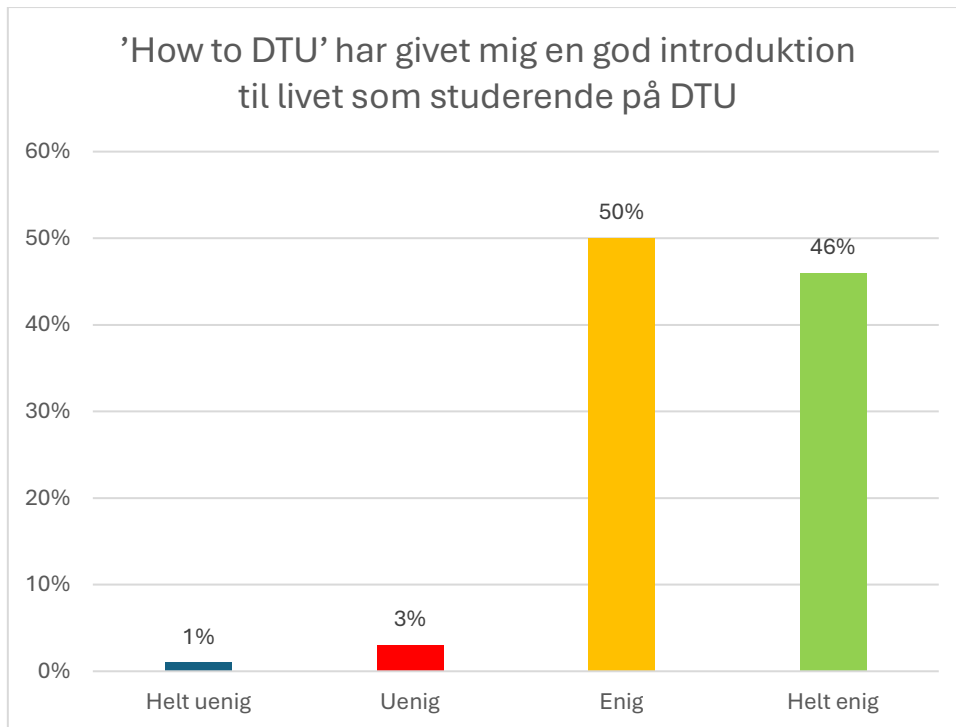

Diagram 42. Andet uddybende spørgsmål om 'How to DTU'

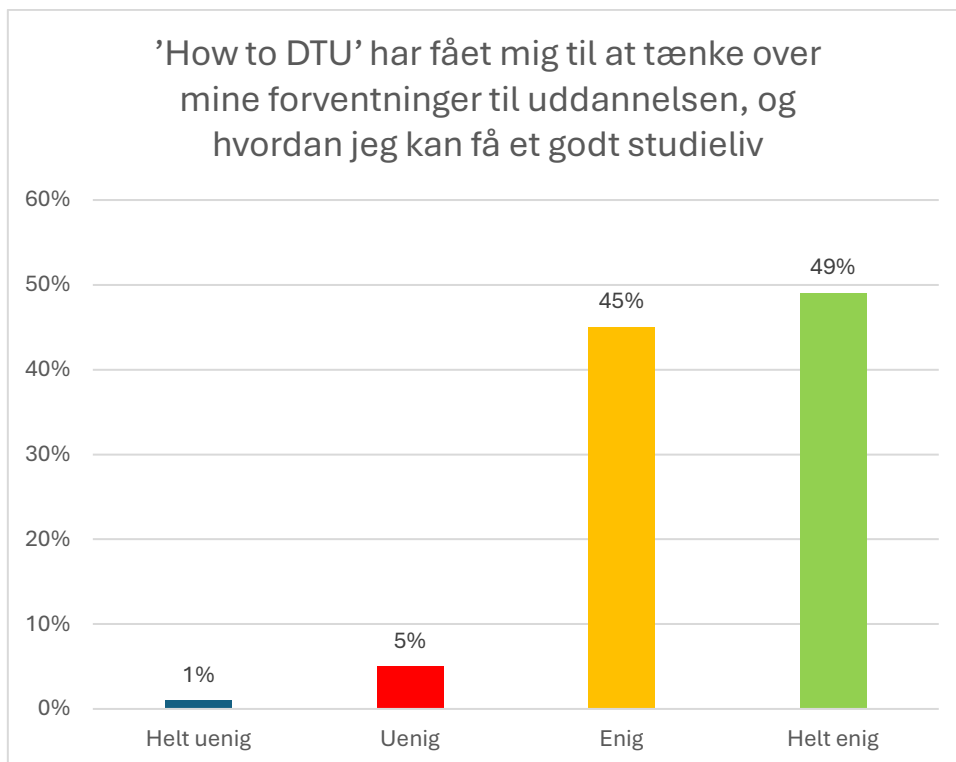

Diagram 43. Tredje uddybende spørgsmål om 'How to DTU'

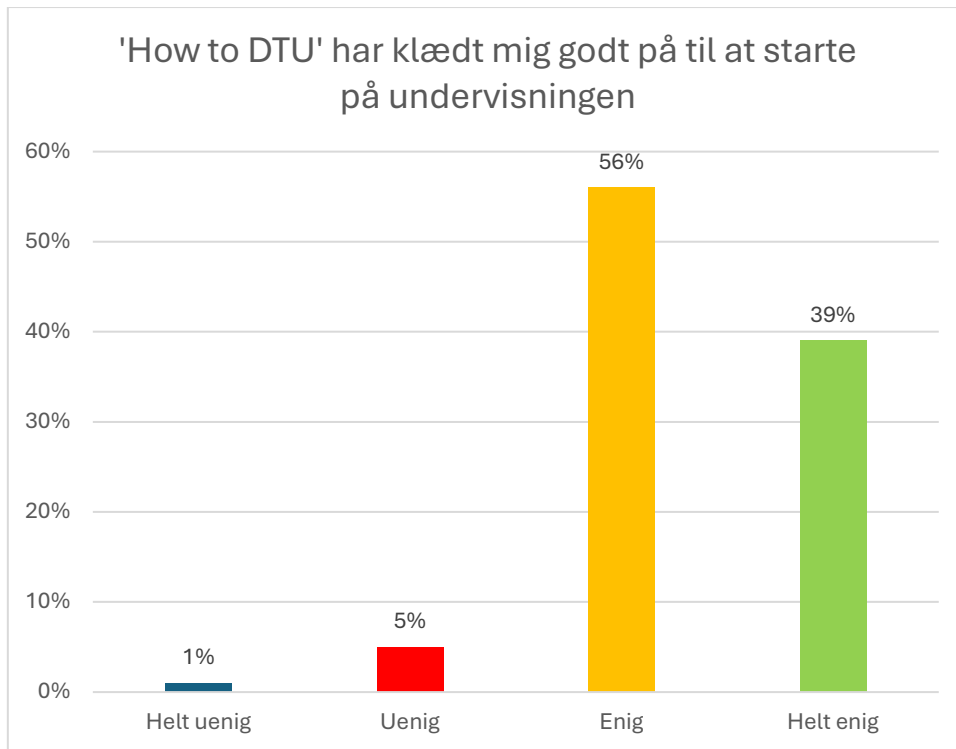

Diagram 44. Fjerde uddybende spørgsmål om 'How to DTU'

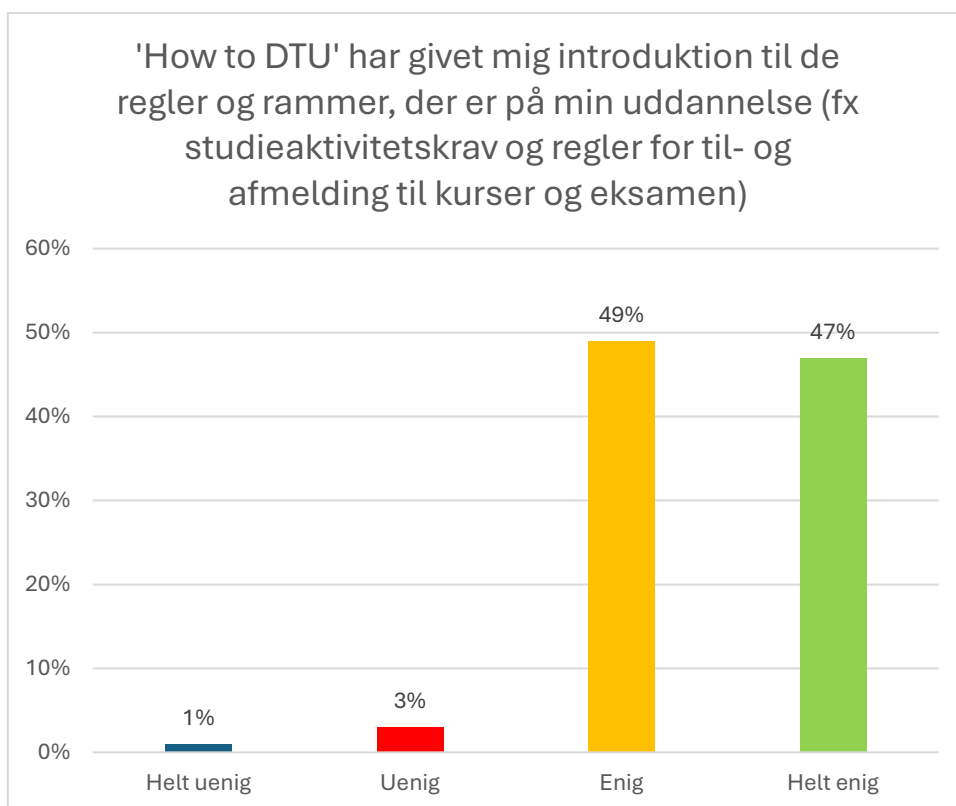

Diagram 45. Femte uddybende spørgsmål om 'How to DTU'

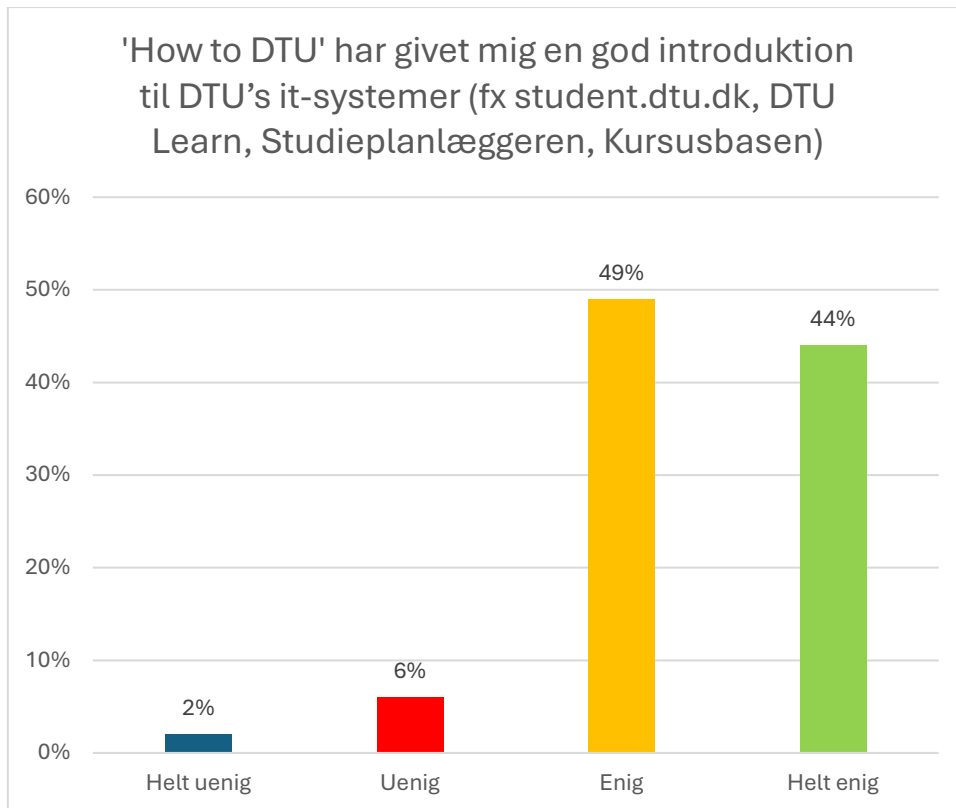

Diagram 46. Sjette uddybende spørgsmål om 'How to DTU'

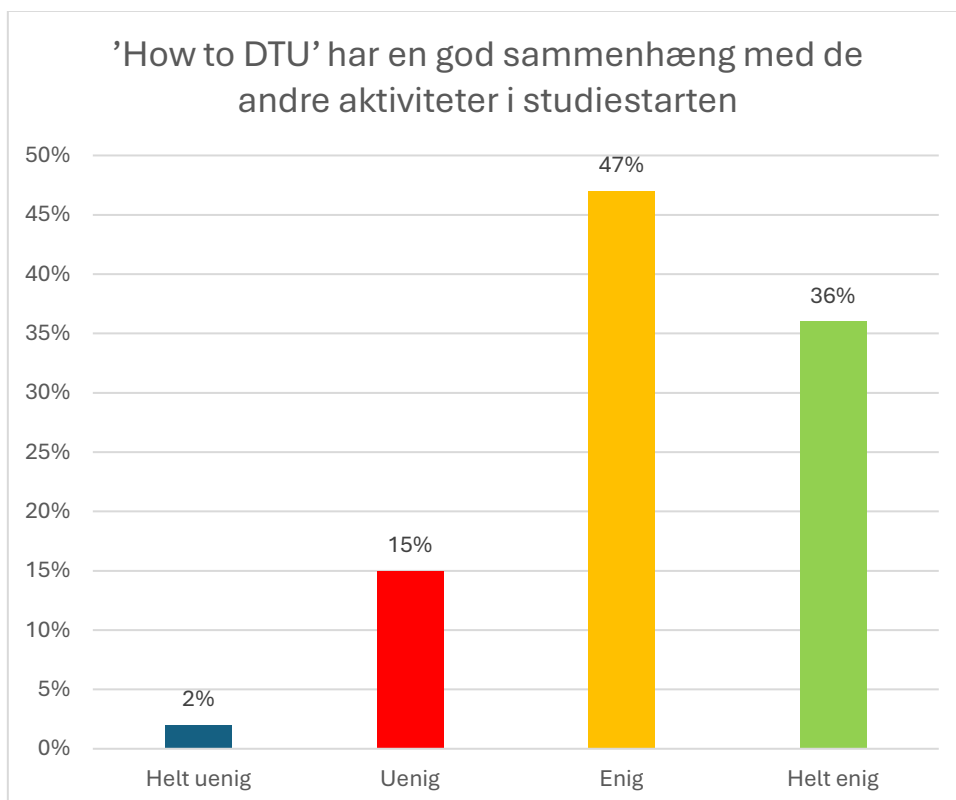

Diagram 47. Syvende uddybende spørgsmål om 'How to DTU'

De studerende, som havde svaret, at de havde gennemført 'How to DTU', eller at de var begyndt, havde mulighed for at skrive yderligere kommentarer til kurset vha. et fritekstfelt:

**Har du andre kommentarer til 'How to DTU', kan du skrive dem her:**

- Even though I am Danish and understand Danish, a lot of the introduction is in Danish, which is really annoying for the students who don't speak Danish. I think all of the videos should be in English.
- It was a wonderful and heartfelt introduction which eased me during my transition from high-school to university. I also liked that it was on DTU Learn which already made me used to accessing and understanding the website.
- I have no further comments.
- I thought it was really good.
- It had all information necessary tho a bit more for international students could be welcome. (For example info you can book SIRI appointment without filling out a form so you will not have to wait for it, and can get it done in days after moving in to Denmark.)
- It was really helpful overall, but the section about student card could have had more details.
- no
- It is a good way to introduce international students to student life in DTU.
- No comment
- i like it!
- If possible, all the video sessions throughout "How to DTU" could be made using English language specific to this program.
- I do not have any other comments about "how to DTU".
- N/A.
- I don't
- All good.
- Having had experience with "How to DTU", I now wish we had something similar at gymnasie start. It is a great digital introduction. I particularly liked the introduction to the IT systems. I think it would be nice to have an introduction to clubs in there, or maybe there could be more about it? Overall, the "How to DTU" course was super great.
- I would maybe add some more videos with GE students.
- For really important dates and rules, it might be better to just state them at How to DTU instead of placing links to the student website.
- Tooo long.
- I think it should be more concise, just the most important info, and maybe more in the FAQ format where we can just look up the answers to the questions we have, because I already knew about a lot of the information that was there.
- I don't have any
- As I have completed some post-secondary education elsewhere, I really hope How to DTU introduces the transfer credits process a bit more.
- It was good!
- Nope

Slutteligt i spørgeskemaet kom spørgsmål relateret til de studerendes eventuelle oplevelse af krænkende eller grænseoverskridende adfærd i forbindelse med deres start på DTU:

Diagram 48. De studerendes oplevelse af krænkende eller grænseoverskridende adfærd

1% af de studerende, svarende til 2 studerende, svarede, at de havde haft oplevelser, der virkede krænkende eller grænseoverskridende. De studerende blev stillet tre uddybende spørgsmål:

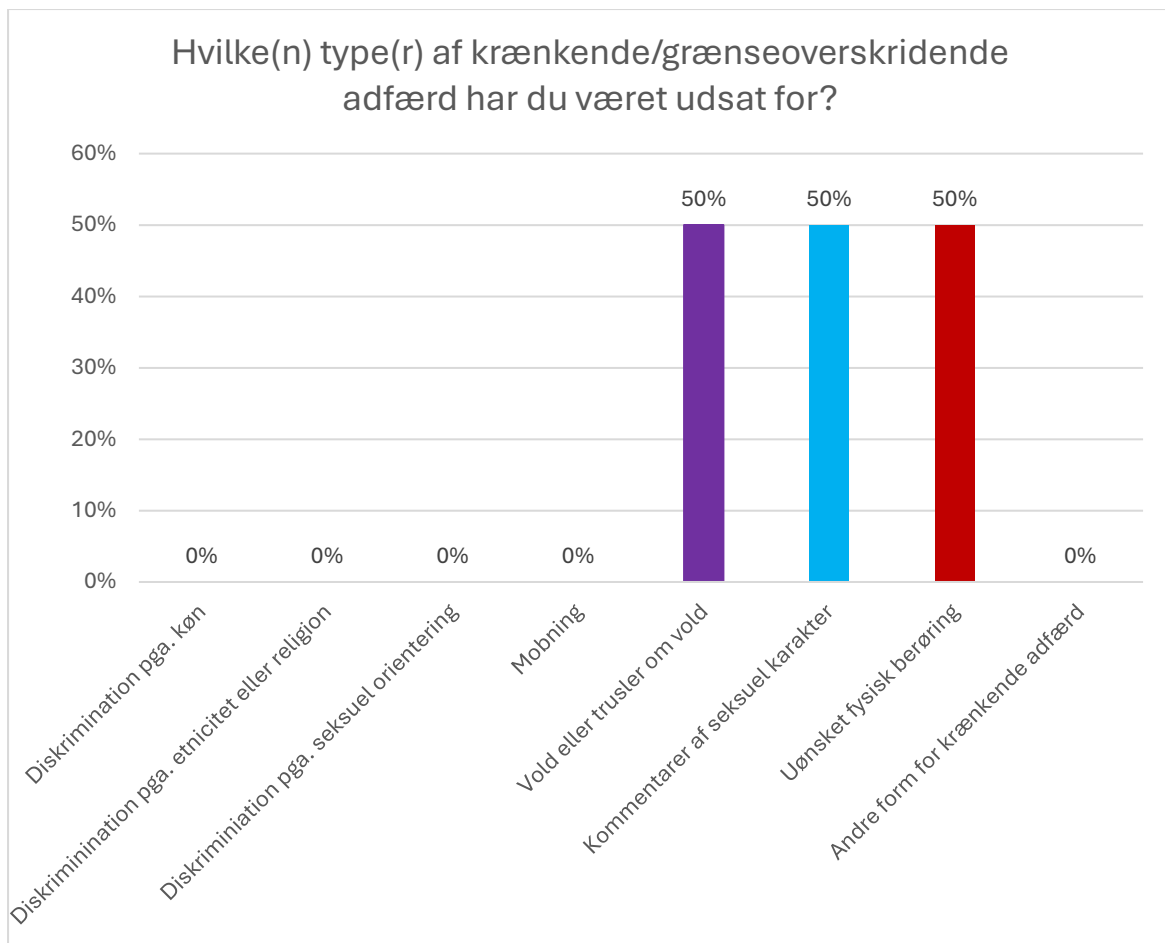

Diagram 49. Typen af krænkende/grænseoverskridende adfærd

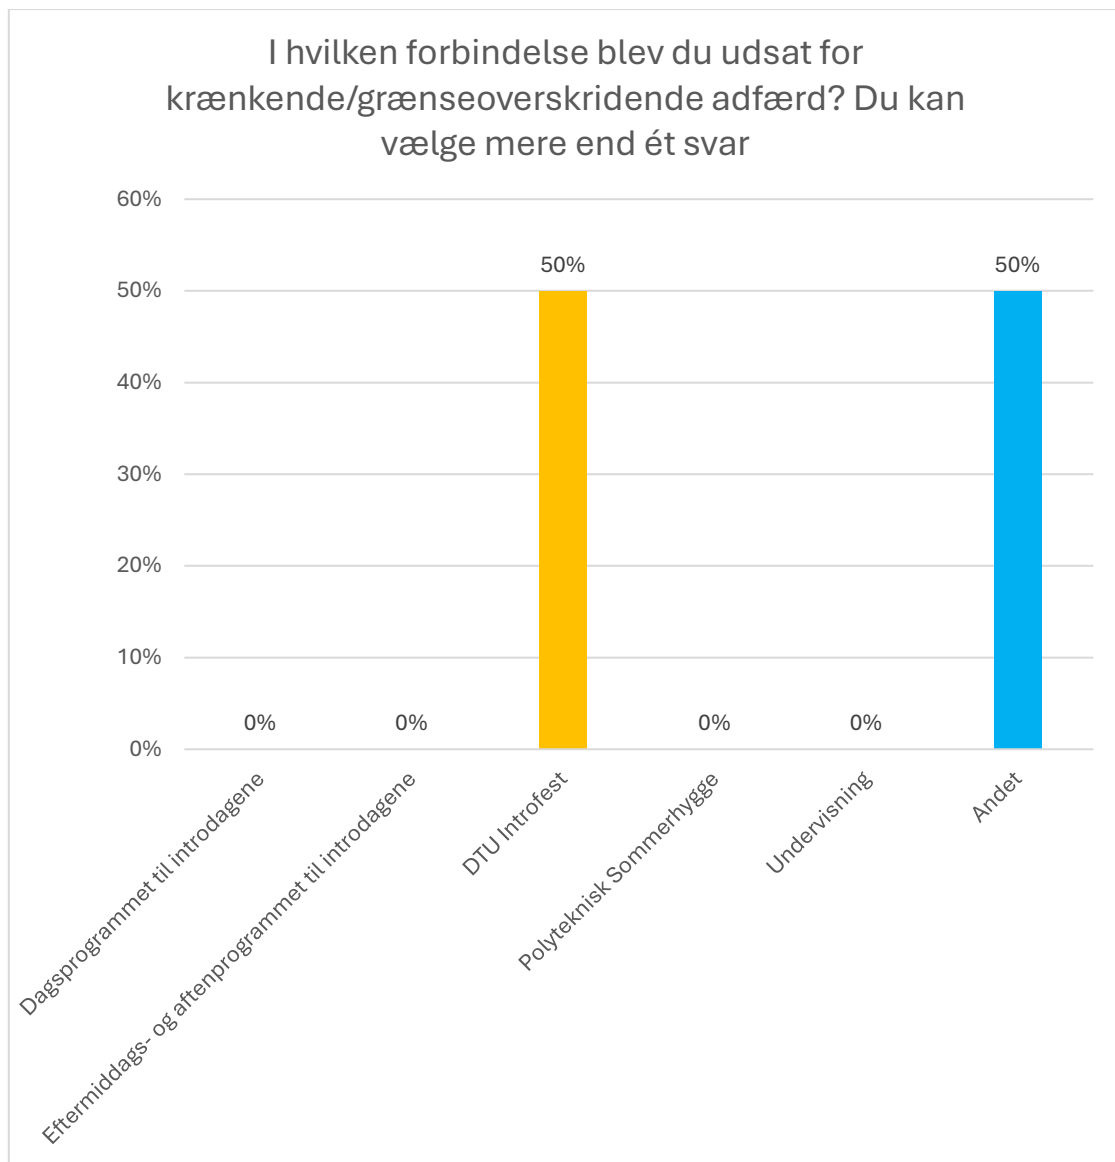

Diagram 50. Hvornår den krænkende/grænseoverskridende adfærd forekom.

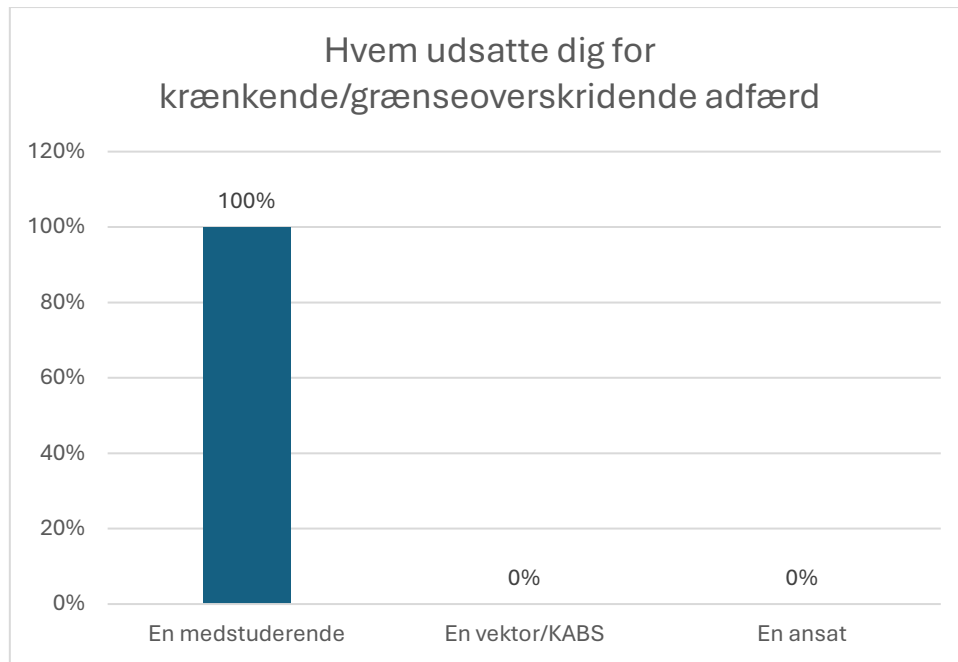

Diagram 51. Hvem der stod bag den krænkende/grænseoverskridende adfærd forekom

Alle de studerende fik vist denne tekst:

**Ved du, hvor du kan få hjælp, hvis du er udsat for krænkende adfærd?**

Der flere steder du kan få hjælp, hvis du bliver udsat for krænkende adfærd, f.eks. hos Studievejledningen. På [student.dtu.dk](http://student.dtu.dk) > Hjælp og vejledning > Krænkende adfærd kan du finde den fulde liste over, hvor du kan få hjælp. Du kan altid henvende dig anonymt og få rådgivning. Din henvendelse bliver behandlet fortroligt

Sidst i spørgeskemaer havde de studerende vha. et fritekstfelt mulighed for at skrive yderligere kommentarer til studiestarten på DTU.

**Er der andet, du gerne vil fortælle os om din studiestart? Så skriv det her:**

- I think jumping headfirst into the courses on Day 1 is good, it makes it clear psychologically that the term has 100% started. I also really appreciate the lectures and lecturers, I have taken some courses before at other institutions but the teaching staff and material do not compare to DTU
- The dances became far too repetitive across the three days. It seemed by the end that activities and conversations with new friends were interrupted just to stand in a circle with the same 3 songs playing on repeat
- Perhaps this is unrelated or not specific to DTU, but I am extremely relieved and grateful that specific buildings are numbered and can be easily found on Google Maps, saving me quite the stress and confusion. I also think it is a smart idea to remain in proximity with our vector through weekly cake meetings and in general. I believe that overall, this was a generous and beneficial introduction to the atmosphere and structure of DTU and GE! :D
- Again, as I mentioned previously: I would've liked a bit more clarity on how to treat my specialisations and ECTS in that regard (that is for the General Engineering study line).
- Nothing to add

- I have already paid a visit to the Study Administration and Study Guidance and the staff working there are super sweet and helpful:) Thank you for making this a great place!
- It would have been nicer, if there had been more vectors coming from the cyber systems specialization of GE
- It was generally very good! Thank you so much! Special highlight to the Intro dances. I really feel they broke the ice and brought the group together.
- no
- Most bachelor students in other semesters got a 5 days, I felt 3 days was a little bit short.
- I am still undecided between specializations but it is something that deals with my own mind and not with DTU I guess.
- No.
- Nothing to add.
- Thanks for your efforts.
- Nothing else to say.
- N/A.
- No
- no
- :/
- Nope, thank you for a great introduction to DTU :)
- Nope
